FINANCIAL, PRODUCTION AND OPERATION HIGHLIGHTS

2023 FOURTH QUARTER

- Revenue decreased by 72% to US\$71.3 million from US\$253.9 million for the same period in 2022.
- Mine operating loss of US\$1.9 million, decreased by US\$98.5 million from mine operating earnings of US\$96.6 million for the same period in 2022.
- Net loss of US\$17.5 million, decreased by US\$66.0 million from net income of US\$48.5 million for the same period in 2022.
- Cash flow used in operation of US\$20.9 million, decreased from cash flow from operation of US\$89.1 million for the same period in 2022.
- Total gold production decreased by 57% to 25,500 ounces from 59,992 ounces for the same period in 2022.
- Total copper production was 184,077 pounds (approximately 83 tonnes) as limited production at the Jiama mine resumed on December 15, 2023. Copper production was 45.1 million pounds (approximately 20,472 tonnes) for the same period in 2022.

2023 ANNUAL RESULTS

- Revenue decreased by 58% to US\$459.4 million from US\$1,104.9 million for the same period in 2022.
- Mine operating earnings decreased by 80% to US\$80.4 million from US\$395.6 million for the same period in 2022.
- Net loss of US\$23.0 million decreased from net income of US\$225.4 million for the same period in 2022.

- Cash flow from operation decreased to US\$1.6 million from US\$447.3 million for the same period in 2022.
- Total gold production decreased by 38% to 147,963 ounces from 238,836 ounces for the same period in 2022.
- Total copper production decreased by 76% to 44.2 million pounds (approximately 20,051 tonnes) from 187.4 million pounds (approximately 85,004 tonnes) for the same period in 2022.

2024 GUIDANCE

The Jiama Mine has gradually resumed production starting from the Phase I processing plant on December 15, 2023, with a daily processing capacity of 6,000 tonnes of ore. As the resumption of the Phase II processing plant is subject to the results of the government's review of the tailings discharge scheme, the timing of resumption is uncertain. Against this backdrop, the Company reports separate production guidance to the two mines in 2024.

CSH Mine:

- It is expected that the gold production range will be 106,097 ounces to 112,528 ounces (approximately 3.3 tonnes to 3.5 tonnes) in 2024.

Jiama Mine:

- The Company expects to receive government's approval for the resumption of operations at the beginning of May 2024. Upon receipt of the approval, Jiama Mine will resume production at the Phase II plant's designed processing capacity of approximately 34,000 tonnes per day (tpd). Given that the actual timing of the production resumption depends on the final date of government's approval, the annual production guidance is subject to uncertainty.
- It is expected that the copper production range will be 95.0 million pounds to 98.0 million pounds (approximately 43,200 tonnes to 44,500 tonnes) in 2024;
- It is expected that the gold production range will be 42,439 ounces to 45,333 ounces (approximately 1.32 tonnes to 1.41 tonnes) in 2024.

The Company's Chairman and CEO, Mr. Junhu Tong, said, "Despite the severe challenges faced by the Company in 2023, our team has maintained a tenacious working spirit and completed some critical objectives, including the resumption of the Phase I processing plant of the Jiama Mine and the return of mining at the CSH Mine to normal levels. In 2024, the Company will focus on promoting the full resumption of the Jiama Mine as soon as possible, maintaining the stable operation of the CSH Gold Mine, and strictly controlling the cost level to fully improve the Company's production and financial performances."
