RESULTS ANNOUNCEMENT FOR THE YEAR ENDED DECEMBER 31, 2012

FINANCIAL HIGHLIGHTS

	2012	2011
	For the Year ended December 31,	
	US\$'000	US\$'000
Revenues	332,387	311,312
Net income	73,514	81,963
Basic earnings per share (cents)	17.90	20.04
Diluted earnings per share (cents)	17.90	20.04
Net cash flows from operations	90,785	115,604
Property, plant and equipment	517,115	361,061
Property, plant and equipment capital expenditures	174,865	71,000
Cash and cash equivalents	181,740	354,313
Working capital	90,586	260,961

RESULTS

The board of directors (the “Board”) of China Gold International Resources Corp. Ltd. (the “Company”) together with its subsidiaries, referred hereto as the “Group”) is pleased to announce the audited consolidated results of the Group for the year ended December 31, 2012 with comparative figures for the comparable period in 2011, as follows:

The following Management Discussion and Analysis of financial condition and results of operations (“MD&A”) is prepared as of March 25, 2013. It should be read in conjunction with the consolidated financial statements and notes thereto of China Gold International Resources Corp. Ltd. (referred to herein as “China Gold International”, the “Company”, “we” or “our” as the context may require) for the year ended December 31, 2012 and the year ended December 31, 2011, respectively. Unless the context otherwise provides, references in this MD&A to China Gold International or the Company refer to China Gold International and each of its subsidiaries collectively on a consolidated basis.

The following discussion contains certain forward-looking statements relating to the Company’s plans, objectives, expectations and intentions, which are based on the Company’s current expectations and are subject to risks, uncertainties and changes in circumstances. Readers should carefully consider all of the information set out in this MD&A, including the risks and uncertainties outlined further in the Company’s Annual Information Form (“Annual Information Form” or “AIF”) dated March 25, 2013 on SEDAR at www.sedar.com. For further information on risks and other factors that could affect the accuracy of forward-looking statements and the result of operations of the Company, please refer to the sections titled “Forward-Looking Statements” and “Risk Factors” and to discussions elsewhere within this MD&A. China Gold International’s business, financial condition or results of operations could be materially and adversely affected by any of these risks.

FORWARD-LOOKING STATEMENTS

Certain statements made herein, other than statements of historical fact relating to the Company, represent forward-looking information. In some cases, this forward-looking information can be identified by words or phrases such as “may”, “will”, “expect”, “anticipate”, “contemplates”, “aim”, “estimate”, “intend”, “plan”, “believe”, “potential”, “continue”, “is/are likely to”, “should” or the negative of these terms, or other similar expressions intended to identify forward-looking information. This forward-looking information includes, among other things; China Gold International’s production estimates, business strategies and capital expenditure plans; the development and expansion plans and schedules for the CSH Gold Mine and the Jiama Mine; China Gold International’s financial condition; the regulatory environment as well as the general industry outlook; general economic trends in China; and statements respecting anticipated business activities, planned expenditures, corporate strategies, participation in projects and financing, and other statements that are not historical facts.

By their nature, forward-looking information involves numerous assumptions, both general and specific, which may cause the actual results, performance or achievements of China Gold International and/or its subsidiaries to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Some of the key assumptions include, among others, the absence of any material change in China Gold International's operations or in foreign exchange rates, the prevailing price of gold, copper and other non-ferrous metal products; the absence of lower-than-anticipated mineral recovery or other production problems; effective income and other tax rates and other assumptions underlying China Gold International's financial performance as stated in the Technical Reports as defined below; China Gold International's ability to obtain regulatory confirmations and approvals on a timely basis; continuing positive labor relations; the absence of any material adverse effects as a result of political instability, terrorism, natural disasters, litigation or arbitration and adverse changes in government regulation; the availability and accessibility of financing to China Gold International; and the performance by counterparties of the terms and conditions of all contracts to which China Gold International and its subsidiaries are a party. The forward-looking information is also based on the assumption that none of the risk factors identified in this MD&A or in the AIF that could cause actual results to differ materially from the forward-looking information actually occurs.

Forward-looking information contained herein as of the date of this MD&A is based on the opinions, estimates and assumptions of management. There are a number of important risks, uncertainties and other factors that could cause actual actions, events or results to differ materially from those described as forward-looking information. China Gold International disclaims any obligation to update any forward-looking information, whether as a result of new information, estimates, opinions or assumptions, future events or results, or otherwise except to the extent required by law. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. The forward-looking information in this MD&A is expressly qualified by this cautionary statement. The reader is cautioned not to place undue reliance on forward-looking information.

MANAGEMENT'S DISCUSSION AND ANALYSIS

THE COMPANY

Overview

China Gold International is a gold and base metal mining company based in Vancouver, Canada. The Company's main business involves the acquisition, development and exploration of gold and base metal properties.

The Company's principal mining operations are the Chang Shan Hao Gold Mine ("CSH Gold Mine" or "CSH Mine" or "CSH"), located in Inner Mongolia, China and the Jiama Copper-Gold Polymetallic Mine ("Jiama Mine" or "Jiama"), located in Tibet, China. China Gold International holds a 96.5% interest in the CSH Gold Mine, while its Chinese joint venture ("CJV") partner holds the remaining 3.5% interest. China Gold International commenced trial gold production at the CSH Gold Mine in July 2007 and commercial production on July 1, 2008. The Company acquired a 100% interest in the Jiama Mine on December 1, 2010. Jiama hosts a large scale copper-gold polymetallic deposit consisting of copper, gold, molybdenum, silver, lead and zinc. The Jiama Mine commenced commercial production in September 2010.

China Gold International's common shares are listed on the Toronto Stock Exchange ("TSX") and The Stock Exchange of Hong Kong Limited (the "Hong Kong Stock Exchange" or "HKSE") under the symbol CGG and the stock code 2099, respectively. Additional information about the Company, including the Company's Annual Information Form, is available on SEDAR at sedar.com as well as Hong Kong Exchange News at hkexnews.hk.

Performance Highlights

Year ended December 31, 2012

- Revenue increased by 7% to US\$332 million in 2012 from US\$311 million in 2011;
- Net profit after income taxes decreased by 10% to US\$74 million in 2012 from US\$82 million in 2011.
- Gold production from the CSH Mine increased to 139,443 ounces (4,337 kilograms) in 2012 from 133,541 ounces (4,154 kilograms) in 2011, a 4% increase.
- Copper production from the Jiama Mine increased significantly by 20% to 11,712 tonnes (26 million pounds) in 2012 from 9,781 tonnes (22 million pounds) in 2011, a 20% increase.
- An updated National Instrument 43-101 ("NI 43-101") compliant, Independent Pre-Feasibility Study for Phase II expansion of the Jiama Mine was completed. Phase II expansion is aimed to increase the mining and processing capacity from 6,000 tonnes per day ("tpd") to 40,000 tpd, and to increase mine life of close to 31 years.
- An updated NI 43-101 compliant, independent Technical Report Expansion Feasibility Study for the Expansion of the CSH Gold Mine was completed. The project is expected to increase the mining and processing capacity from the current 30,000 tpd to 60,000 tpd by the end of 2013, with a mine life of 11 years.

Three months ended December 31, 2012

- Revenue of US\$93 million earned for the period, consistent with US\$94 million for the same period in 2011;
- Net profit after income taxes decreased by 23% to US\$21 million in the period from US\$27 million for the same period in 2011.
- Gold production from the CSH Mine decreased by 14% to 35,403 ounces (1,101 kilograms) in the period from 41,297 ounces (1,284 kilograms) for the same period in 2011.
- Copper production from the Jiama Mine increased significantly, by 11% to 3,293 tonnes (7 million pounds) in the period from 2,964 tonnes (6 million pounds) for the same period in 2011.

Selected Annual Information

	Year ended December 31		
	2012	2011	2010
US\$ Millions except for per share			
Total revenue	332	311	133
Profit from continuing operations	99	110	59
Net profit	74	82	27
Basic earnings per share (cents)	17.90	20.04	13.82
Diluted earnings per share (cents)	17.90	20.04	13.76
Total assets	1,806	1,745	1,656
Total non-current liabilities	279	321	322
Distribution or cash dividends declared per share	—	—	—

OUTLOOK

- Expected production of 145,000 ounces of gold from the CSH Mine in 2013.
- Expected production of 26.5 million pounds of copper from the Jiama Mine in 2013.
- At CSH, the Company is building a new 30,000 tpd stand-alone crushing, heap leaching and ADR (Absorption, Desorption and Refining) plant system in addition to the existing 30,000 tpd facility. Expansion construction is expected to be completed in the fourth quarter of 2013, at which time the first ore is to be placed on the leach pad in the fourth quarter of 2013.
- The Company expects to complete the Jiama Mine's Phase II Independent Feasibility Study and to release an updated NI43-101 compliant report in the second quarter of 2013.
- Jiama's production capacity expansion will be done in two stages. Stage one, planned for completion during the fourth quarter of 2013, includes completion of a new 20,000 tpd mill. Stage two is expected to be completed by 2014. By 2015, Jiama is hoped to reach its planned full capacity of 40,000 tpd of ore.
- The Company plans to drill approximately 30,000 meters at the Jiama Mine during 2013.
- The Company will continue to leverage the technical and operating experience of the Company's controlling shareholder, China National Gold Group Corporation ("CNG"), to improve operations at its mines. In addition, the Company continues to focus its efforts on increasing production while minimizing costs at both mines.
- To fulfill its growth strategy, the Company is continually working with CNG and other interested parties to identify potential international mining opportunities, namely projects outside of China, which can be readily and quickly brought into production with the possibility of further expansion through continued exploration.

MANAGEMENT'S DISCUSSION AND ANALYSIS

RESULTS OF OPERATIONS

Selected Quarterly Financial Data

QUARTER ENDED (US\$ in thousands except per share)	2012				2011			
	31-Dec	30-Sep	30-Jun	31-Mar	31-Dec	30-Sep	30-Jun	31-Mar
Revenues	93,387	84,938	76,484	77,578	93,544	89,407	92,938	35,423
Cost of sales	54,190	51,207	49,896	52,165	61,428	53,017	52,519	23,587
Mine operating earnings	39,197	33,731	26,588	25,413	32,114	36,391	40,419	11,837

Selected Quarterly and Annual Production Data and Analysis

	CSH Mine			
	Three months ended		Year ended	
	December 31,		December 31,	
	2012	2011	2012	2011
Gold produced (ounces)	35,403	41,297	139,443	133,541
Gold sold (ounces)	37,593	41,954	138,943	136,290
Total production cost (US\$) of gold per ounce	987	931	928	876
Cash production cost* (US\$) of gold per ounce	887	836	825	778

* Non-IFRS measure

Gold production at the CSH Mine decreased by 14% from 41,297 ounces for the three months ended December 31, 2011 to 35,403 ounces for the three months ended December 31, 2012. The decrease in production is due to lower grade ore being placed on the leach pad during the fourth quarter of 2012 as compared to the same period in 2011.

Gold production increased by 4% from 133,541 ounces for the year ended December 31, 2011 to 139,443 ounces for the year ended December 31, 2012. The increase is mainly due to a finer size of crushed ore being placed on the leach pad, an increased average flow rate of leaching solution, improved carbon absorption and higher accumulative recovery rates. The increase reflects the results of management's efforts to optimize mining and processing procedures to achieve maximum production.

The total production cost of gold per ounce and cash production cost of gold per ounce for the three months and the year ended December 31, 2012 both increased compared with the same periods in 2011. The primary reasons are the greater amount of waste rock mined, and higher processing costs experienced in 2012.

MANAGEMENT'S DISCUSSION AND ANALYSIS

	Jiama Mine			
	Three months ended December 31,		Year ended December 31,	
	2012	2011	2012	2011
Copper produced (tonnes)	3,293	2,964	11,712	9,781
Copper produced (pounds)	7,259,351	6,534,987	25,820,417	21,563,193
Copper sold (tonnes)	2,941	2,998	11,186	9,854
Copper sold (pounds)	6,483,437	6,609,967	24,660,574	21,725,105
Gold produced (ounces)	3,447	3,083	13,487	8,133
Gold sold (ounces)	3,623	2,790	13,496	8,631
Total production cost* (US\$) of copper per tonne	8,080	9,274	9,097	9,166
Total production cost* (US\$) of copper per pound	3.67	4.21	4.13	4.16
Total production cost* (US\$) of copper per tonne after by-products credit***	4,626	6,397	5,683	6,151
Total production cost* (US\$) of copper per pound after by-products credits***	2.10	2.90	2.58	2.79
Cash production cost** (US\$) per tonne of copper	6,792	7,099	6,695	6,727
Cash production cost** (US\$) per pound of copper	3.08	3.22	3.04	3.05
Cash production cost** (US\$) of copper per tonne after by-products credit***	3,337	4,492	3,281	3,712
Cash production cost** (US\$) of copper per pound after by-products credits***	1.51	2.04	1.49	1.68

* Production costs include expenditures incurred at the mine sites for the activities related to production including mining, processing, mine site G&A and royalties etc.

** Non-IFRS measure

*** By-products credit refers to the sales of gold and silver during the corresponding period.

During the three months ended December 31, 2012, the Jiama Mine produced 3,293 tonnes (7.3 million pounds) of copper, which increased by 11% compared with the comparative period in 2011 (2,964 tonnes, or 6.5 million pounds). In addition, copper production (11,712 tonnes, or 25.8 million pounds) in 2012 increased by 20% from 2011 (9,781 tonnes, or 21.6 million pounds). The significant growth in production mainly resulted from the increased volume of ores processed and better recovery rates achieved during 2012.

Total production cost and cash production cost of copper per tonne and per pound both decreased due to the improvement in the ore grade during the period. The Company is closely monitoring production costs at the Jiama Mine and will continue to make efforts to reduce costs.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Review of Quarterly and Annual Data

Three months ended December 31, 2012 compared to three months ended December 31, 2011

Revenue slightly decreased US\$0.1 million, from US\$93.5 million for the three months ended December 31, 2011, to US\$93.4 million for the three months ended December 31, 2012. Revenue from the CSH Mine accounted for 67%, or US\$62.4 million (2011: US\$68.0 million), of total revenue for the quarter. The decrease in production, due to lower grades of ore placed on the heap leach pad, is attributable to the 10% decrease in gold sold from 41,954 ounces (gold produced: 41,297 ounces) in 2011 to 37,593 ounces (gold produced: 35,403 ounces) for the same period in 2012. Revenue from the Jiama Mine accounted for 33% of total revenue, or US\$31 million (2011: US\$25.5 million), with an increase of US\$5.5 million for the quarter in comparison to 2011. Although total copper sold decreased by 2% from 2,998 tonnes (6.6 million pounds) for the three months ended December 31, 2011 to 2,941 tonnes (6.5 million pounds) for the same comparative period in 2012, it was offset by increased sales volume and market prices for other minerals produced, including gold and silver.

Cost of sales decreased by 12% or US\$7.2 million, from US\$61.4 million for the three months ended December 31, 2011 to US\$54.2 million, for the same period in 2012, which is primarily attributable to Jiama's decrease in cost of sales of US\$5.3 million for the quarter ending December 31, 2012 in comparison to the same period in 2011. The reduction is due to optimization of ore processing and improved recovery rates. Cost of sales as a percentage of revenue for the Company decreased from 66% to 58% for the three months ended December 31, 2011 compared to the same period in 2012.

Mine operating earnings for the Company increased by 22%, or US\$7.1 million, from US\$32.1 million for the three months ended December 31, 2011 to US\$39.2 million for the three months ended December 31, 2012. Mine operating earnings as a percentage of revenue increased from 34% to 42% for the three months ended December 31, 2011 compared to the three months ended December 31, 2012.

General and administrative expenses increased by 72%, or US\$3.3 million, from US\$4.6 million for the three months ended December 31, 2011 to US\$7.9 million for the three months ended December 31, 2012. Professional services provided in relation to the expansion projects at both the CSH Mine and Jiama Mine, such as the preparation of the Independent Technical Report and Pre-Feasibility Study, contributed to the increase in general and administrative expenses. In addition, increased costs such as office and human resources are attributed to and in line with the Company's overall growth strategy.

Income from operations for the fourth quarter of 2012 decreased by 9%, or US\$3.1 million, from US\$34.3 million for the three months ended December 31, 2011 to US\$31.2 million for the three months ended December 31, 2012. The decrease was primarily attributable to a decrease of US\$4.6 million in the CSH Mine's operating earnings.

Finance costs decreased by 33%, or US\$1.6 million, from US\$4.8 million for the three months ended December 31, 2011 to US\$3.2 million for the three months ended December 31, 2012, primarily due to lower interest expenses resulting from reduced principal balances on outstanding debts. During the three months ended December 31, 2012, the Company repaid approximately US\$36.4 million on its outstanding loans. No interest was capitalized for the three months ended December 31, 2012.

Foreign exchange loss increased by 153%, or US\$2.4 million, from a gain of US\$1.6 million for the three months ended December 31, 2011 to a loss of US\$0.8 million for the three months ended December 31, 2012. The current period's loss is related to the revaluation of monetary items held in Chinese RMB and Hong Kong Dollars based on changes in the RMB/HKD/USD exchange rates.

Interest and other income decreased from US\$2.8 million for the three months ended December 31, 2011 to US\$1.4 million for the three months ended December 31, 2012. Term deposits which matured during 2012 were drawn down and used as funding for the expansion costs incurred by the CSH Mine and Jiama Mine, as a result, less interest income arose from term deposits in fourth quarter of 2012 as compared to the same period in 2011.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Income tax expense increased by 14%, or US\$0.9 million, from US\$6.6 million for the three months ended December 31, 2011 to US\$7.5 million for the same period in 2012, primarily due to the Jiama Mine's increase in revenue.

Net income of the Company decreased by US\$6.2 million from US\$27.2 million for the three months ended December 31, 2011 to US\$21 million for the three months ended December 31, 2012.

Year ended December 31, 2012 compared to year ended December 31, 2011

Revenue increased by 7%, or US\$21.1 million, from US\$311.3 million for the year ended December 31, 2011, to US\$332.4 million for the year ended December 31, 2012. Revenue from the CSH Mine accounted for 67%, or US\$223.8 million (2011: US\$214.5 million), of total revenue for the year. Changes in CSH's 2012 revenue total included a 2% increase in gold sold, from 136,290 ounces (gold produced: 133,541 ounces) in 2011 to 138,943 ounces (gold produced: 139,443 ounces), due to improvements in gold recovery through finer ore crushing, management of heap leaching, and higher commodities prices. Revenue from the Jiama Mine accounted for 33%, or US\$108.6 million (2011: US\$96.8 million), of total revenue for the year. Total copper sold increased by 14% from 9,854 tonnes (21.7 million pounds) for the year ended December 31, 2011 to 11,186 tonnes (24.7 million pounds) for the same period in 2012, mainly attributed to increased production levels due to higher grades and volumes of ore mined, improved recovery rates and increased sales of other minerals produced by the Jiama Mine.

Cost of sales increased by 9% or US\$16.9 million, from US\$190.6 million for the year ended December 31, 2011 to US\$207.5 million for the same period in 2012. Jiama's cost of sales contributed US\$78.6 million, or 38%, compared to US\$71.2 million in 2011. Cost of sales as a percentage of revenue for the Company slightly increased from 61% to 62% for the year ended December 31, 2011 compared to 2012. The increase in cost of sales is attributable to greater amounts of waste rock mined in the process of increasing production at the CSH Mine and to the increase in underground mining at the Jiama Mine.

Mine operating earnings for the Company increased by US\$4.1 million, from US\$120.8 million for the year ended December 31, 2011 to US\$124.9 million for the year ended December 31, 2012 due to increased revenue, offset by increased mining and production costs for both mines. Mine operating earnings as a percentage of revenue decreased slightly from 39% for the year ended December 31, 2011 to 38% for the year ended December 31, 2012.

General and administrative expenses increased by 44%, or US\$7.7 million, from US\$17.4 million for the year ended December 31, 2011 to US\$25.1 million for the year ended December 31, 2012. The increase is attributable to professional services incurred for expansion planning and implementation at the CSH Mine and the Jiama Mine, office lease and administration expenses for the Beijing operations centre, and fees and services provided in relation to shareholder meetings. These expenses are reflective of costs associated with operational growth and are in line with the Company's overall growth strategy.

Income from operations decreased by 9%, or US\$10.4 million, from US\$109.9 million for the year ended December 31, 2011 to US\$99.5 million for the year ended December 31, 2012.

Finance costs decreased by 11%, or US\$1.5 million, from US\$14 million for the year ended December 31, 2011 to US\$12.5 million for the comparative period in 2012. During 2012, the Company made principal repayments of approximately US\$45 million on its outstanding debts. No interest was capitalized during the year ended December 31, 2012.

Foreign exchange gain decreased by 93%, or US\$2.18 million, from a gain of US\$2.4 million for the year ended December 31, 2011 to a gain of US\$0.17 million for the year ended December 31, 2012. The current period's gain is related to the translation of the foreign subsidiaries' books of account denominated in Chinese RMB to US dollar.

Interest and other income increased from US\$6.3 million for the year ended December 31, 2011 to US\$12.6 million for the year ended December 31, 2012. The increase in other income during 2012 is primarily attributable to interest earned on term deposits held by the Company, with longer maturity periods and higher interest rates, in comparison to the same period in 2011.

Income tax expense increased by 16%, or US\$3.7 million, from US\$22.5 million for the year ended December 31, 2011 to US\$26.2 million for the same period in 2012. The increase is the result of increased taxable income earned from mine operations.

Net income of the Company decreased by US\$8.5 million from US\$82.0 million for the year ended December 31, 2011 to US\$73.5 million for the year ended December 31, 2012.

MANAGEMENT'S DISCUSSION AND ANALYSIS

NON-IFRS MEASURES

The following table provides certain unit cost information on a cash cost of production per ounce (non-IFRS) basis for the CSH Gold Mine for the three months and years ended December 31, 2012 and 2011:

	CSH Mine			
	Three months ended December 31,		Year ended December 31,

The cash cost of production is a measure that is not in accordance with IFRS.

The Company has included cash production cost per gold ounce data to supplement its consolidated financial statements, which are presented in accordance with IFRS. Non-IFRS measures do not have any standardized meaning prescribed under IFRS, and therefore they may not be comparable to similar measures employed by other companies. The data is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance, operating results or financial condition prepared in accordance with IFRS. The Company has included cash production cost per ounce data because it understands that certain investors use this information to determine the Company's ability to generate earnings and cash flow. The measure is not necessarily indicative of operating results, cash flow from operations, or financial condition as determined under IFRS. Cash production costs are determined in accordance with the Gold Institute's Production Cost Standard.

The following table provides a reconciliation of cost of sales to the cash costs of production in total dollars and in dollars per gold ounce for the CSH Mine or per copper tonne for the Jiama Mine:

	CSH Mine (Gold)							
	Three months ended December 31,				Year ended December 31,			
	2012		2011		2012		2011	
	US\$	Per ounce	US\$	Per ounce	US\$	Per ounce	US\$	Per ounce

MINERAL PROPERTIES

The CSH Mine

The CSH Mine is located in the Inner Mongolia Autonomous Region of China (Inner Mongolia). The property hosts two low-grade, near surface gold deposits, along with other mineralized prospects. The main deposit is called the Northeast Zone (the "Northeast Zone"), while the second, smaller deposit is called the Southwest Zone (the "Southwest Zone").

The CSH Mine is owned and operated by Inner Mongolia Pacific Mining Co. Limited, a Chinese Joint Venture in which China Gold International holds a 96.5% interest and Ningxia Nuclear Industry Geological Exploration Institution (formerly known as Brigade 217) holds the remaining 3.5%.

CSH Mine Expansion

The CSH Mine is currently operating at a 30,000 tpd capacity, producing over 133,000 ounces of gold per annum. A NI 43-101 compliant Technical Report Expansion Feasibility Study for the CSH Gold Project ("the CSH Technical Report") has been completed by a group of Qualified Persons ("QP"). This report was prepared following the 2011 drilling campaign. The CSH Technical Report supports an expansion plan to increase the processing capacity from 30,000 tpd to 60,000 tpd with a mine life of 11 years, under which the open pit reserves at the CSH Mine stand at over 213 million tonnes of ore containing about 4.08 million ounces of gold. Gold production will be increased from the current 139,443 ounces per annum to about 260,000 ounces per annum by 2014. The estimated capital expenditure is US\$212.9 million. The After-Tax Net Present Value (NPV) is US\$642 million using a discount rate of 9% and an assumed gold price of \$1,380/oz.

The CSH Technical Report is available at sedar.com and hkexnews.hk.

Mineral Resources update

The 2011 drilling campaign added significant tonnages above cutoff at a slightly lower grade, partly due to the confirmation of grades and an upgrade in resource classification down-dip and laterally. The CSH deposit in the south-west area is now well delineated, and significant potential exists for down-dip extensions to the mineralization. Mineralization at depth in the northeast area has been confirmed, with increases in both tonnages and confidence.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The mineral resource estimate for the CSH Mine reported herein was prepared by independent consultant, Mario Rossi, M.Sc., Min. Eng., of GeoSystems International Inc. using a "Resource Pit" generated by independent consultant, John Nilsson, M.Sc., P. Eng., of Nilsson Mine Services Ltd. The estimate was completed using MineSightR software using three dimensional block modeling (12.5 meter by 12.5 meter by 6.0 meter block size). Interpolation parameters have been derived based on a geostatistical analysis conducted on 2-meter composited drill hole data. Block grades have been estimated using an Indicator-modified Ordinary Kriging (OK) method and the mineral resources have been classified based on proximity to sample data and the continuity of mineralization in accordance with CIM Guidelines and best practices. The CSH resource has been estimated using a total of 108 new diamond drill holes plus all the previous drill holes, variably spaced at 50 to 150 meter intervals and reconciled with the existing mining blast hole assay data.

The below table corresponds to reported resources as at December 31st, 2012.

All CSH Resources below pit surface to December 31st, 2012 within Resource Pit, 2012 Resource Model									
Cutoff (g/t)	Measured		Indicated		Measured+Indicated		Inferred		Au Grade (g/t)

* Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not fully account for mineability, selectivity, mining loss and dilution. These mineral resource estimates include inferred mineral resources that are normally considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. Even though current mining is going smoothly at CSH with M&I class mineral resources, there is no certainty that inferred mineral resources will be converted to measured and indicated categories through further drilling, or into mineral reserves, once economic considerations are applied.

Mineral Reserves Update

A mine expansion plan for CSH to expand from its current 30,000 tpd to 60,000 tpd annual capacity has been prepared by the Changchun Gold Design Institute ("CGDI"). In support of this study a new mine development plan has been completed using the current resource model and a long term gold price estimate of US\$1,380/ounce. Pit optimization and design was undertaken by CGDI using Micromine software. The pit limits and reserves were validated by Nilsson Mine Services Ltd. ("NMS"). Mining is carried out by the contractor China Railway 19th Bureau.

Mineable reserves reported using the 2011-year end topographic surface and a cutoff grade of 0.28 g/t have increased to 213.5 million tonnes with an average diluted grade of 0.59 g/t Au. The strip ratio is 3.31 with a total of 707.4 million tonnes of waste stripped. Total material moved from the pit will be 920.9 million tonnes.

MANAGEMENT'S DISCUSSION AND ANALYSIS

CSH Mine Reserves by category, Northeast and Southwest pits combined at December 31, 2012 under NI 43-101:

Class	bcm x 1000	t x 1000	Insitu Au g/t	Diluted Au g/t
Proven	28,803	80,355	0.64	0.62
Probable	42,703	119,678	0.60	0.58
Total	71,706	200,033	0.62	0.60

Production Update

CSH Mine	Three months ended December 31,		Year ended December 31,	
	2012	2011	2012	2011
Ore mined and placed on pad (tonnes)	2,896,196	2,636,332	11,482,902	11,461,617
Average grade of ore (g/t)	0.47	0.57	0.48	0.53
Recoverable gold (ounces)	39,614	41,670	138,742	114,487
Ending ore inventory (ounces)	36,939	37,140	36,939	37,140
Waste rock mined (tonnes)	15,403,048	9,698,462	48,603,889	31,487,783

For the three months ended December 31, 2012, the total amount of ore put on the leach pad was 2.9 million tonnes, with total contained gold of 39,614 ounces (1,232 kilograms). The accumulative project-to-date gold recovery rate has increased from approximately 49% to 53% to the end of 2012.

Exploration

During 2012, the Company continued to drill at the CSH Mine to explore for higher grade mineralization down depth and mineralization in between the two open pits, where previous drilling was limited due to very broken ground. By December 31, 2012, the Company had successfully completed 9,927 meters of drilling in 12 diamond drill holes. The drill program is complete and mineralization continues further down depth with slightly improved gold grade.

The following table shows the exploration expenditures expensed and capitalized during the years ended December 31, 2012 and December 31, 2011.

	CSH Mine Year ended December 31,	
	2012 US\$	2011 US\$
Exploration expensed	369,768	467,251
Exploration capitalized	14,906,598	6,381,602
	15,276,366	6,848,853

MANAGEMENT'S DISCUSSION AND ANALYSIS

The Jiama Mine

The Company acquired the Jiama Mine on December 1, 2010. Jiama is a large copper-gold polymetallic deposit containing copper, gold, silver, molybdenum, and other metals located in the Gandise metallogenic belt in Tibet, Autonomous Region of China.

The Jiama Mine presently has underground mining and open-pit mining operations which comprises the smaller Tongqianshan Pit and the larger Niumatang Pit. An underground ore transportation system has been completed which includes two shafts having an initial depth of 355 meters, which are planned to extend to a final depth of 600 meters. This underground ore transportation system is used to transfer ore from the near pit crushing facilities to the existing Phase I 6,000 tpd processing plant. This underground ore transportation system is independent of the Phase II underground mine plans.

Phase I of the Jiama Mine commenced mining operations in the latter half of 2010 and reached its design capacity of 6,000 tpd in early 2011.

Phase II Expansion

The Company has retained engineering firm Minarco-Mine Consult (MMC), part of the Runge Limited Group of Companies, in conjunction with independent consulting engineers and management to complete a prefeasibility study for potential expansion. The Company plans to expand the Jiama Mine from its current mining and processing capacity of 6,000 tpd to 40,000 tpd of ore through the expansion of current open-pit operations and the development of new open-pit and underground mining operations. Phase II Expansion will include four open pits, one underground mine, and a new floatation plant with a processing capacity of 34,000 tpd. Processing capacity will be increased from the current production rate of 1.8 million tonnes of ore per year to 12.3 million tonnes of ore per year, producing approximately 176 million pounds of Cu, 2.3 Kt of Mo, 35 Koz of Au, 2.7 Moz of Ag, per annum over a period of 31 years. LOM (Life Of Mine) average head grade will be 0.77%, 0.03%, 0.22 g/t and 12 g/t for Cu, Mo, Au and Ag respectively. The estimated capital expenditure is US\$705 million. The project has after-tax Net Present Value (NPV) of US\$1.2 billion with a discount rate of 9% at metal price assumptions of: \$2.90/lb Cu, \$18/lb Mo, \$1,380/oz Au, \$16.5/oz Ag. The project has after-tax Internal Rate of Return (IRR) of 53.7% and payback period of 4.5 years

On October 25, 2012, MMC completed a project review and, as part of its engagement, produced a NI 43-101 compliant Independent Pre-Feasibility Study Technical Report ("Jiama Technical Report") on the Jiama Mine. The Jiama Technical Report was filed at sedar.com and hkexnews.hk on November 12, 2012.

Mineral Resources Update

A Mineral Resource estimate, dated April 28, 2012, has been independently completed by MMC in accordance with the CIM Definitions Standards under NI 43-101. The updated Mineral Resource is based on 22 infill drill holes totaling 10,720m completed in late 2011. These holes were drilled within the proposed pit locations which enabled detailed mine planning to be undertaken. Further drilling has recently been completed over the South Pit area to upgrade the classification of the existing Inferred Mineral Resources within the pit areas with sampling and assaying ongoing.

During the review of the data MMC noted that whilst the mineralization occurs all within a single mineralized body, Au and Ag mineralization within the orebody had a significantly higher spatial variability than the other elements. As a result MMC has classified the Au and Ag resource presented in Table 1.2 separately; this classification takes into account the proposed large scale mining techniques where Au and Ag will only be credits to the principal products from the operations. MMC has assumed that Au and Ag will not be used as a single cut-off grade for a selected mining block and will be mined in conjunction with the other elements.

The Mineral Resources are summarized in Table 1.1 and 1.2. The Mineral Resources presented in Table 1.2 for Au and Ag are inclusive and not in addition to the Mineral Resources in Table 1.1 and occur within the same mineralized body.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Note: Figures reported are rounded which may result in small tabulation errors.

* Cu Equivalent is based on associated component grades, process recoveries and bank consensus forecast metal pricing as at May 2012 (before tax). The key inputs are outlined in the technical report on sedar.com

Mineral Reserves Update

A Mineral Reserve estimate, dated April 28, 2012, has been independently completed by MMC in accordance with the CIM Definitions Standards under NI 43-101.

Table 1.3 presents the Mineral Reserves estimate for the Project reported at a 0.35% Cu-equivalent cut-off grade for the ore extracted via open cut methods and 0.5% to 0.65% Cu-equivalent cut-off grade for the ore extracted via underground methods. The Mineral Reserves is inclusive of, and not additional to the Mineral Resources in Tables 1.1 and 1.2.

Table 1.3
Jiama Project Statement of NI 43-101 Mineral Reserve Estimate as of December 31, 2012

Category	Ore (kt)	Cu (%)	Mo (%)	Grade				Contained Metal					
				Aug/t	Aug/t	Pb (%)	Zn (%)	Cu (kt)	Mo (kt)	Au (t)	Ag (t)	Pb (kt)	Zn (kt)

Cu Equivalent cut off grades are based on associated component grades, process recoveries and bank consensus forecast metal pricing as at May 2012 (before tax). The key inputs are outlined in the technical report on sedar.com

Exploration

As of October 7, 2012, the Company successfully completed 40,496 meters of drilling during 2012. The resource model has indicated that a significant amount of inferred resource in skarn-type has been identified between exploration lines 42 and 92. The proposed infill drillings program for 2013 will use a 50x50 meter grid to provide additional technical and structural control and to further delineate the mineralization between exploration lines 42 and 64, and use a 100x100 meter grid to control the ore body between lines 64 and 92. The purpose of the drilling program is to upgrade a significant portion of the Inferred resource to the Measured and Indicated resource categories, which in turn, can be used to evaluate additional ore reserves for both open pit and underground mining.

In 2013, the Company plans to drill about 30,000 meters. The main goals of the 2013 drilling program are:

- to further delineate the South Pit ore body to define a potentially larger final pushback
- infill drilling to further define the main high grade ore body in current underground mining area
- to further delineate the gold deposit discovered in 2012 on the east side of the South Pit
- to either confirm the area for a waste dump (condemnation drilling) or identify if there is a potential for another hornfels open pit
- to test a porphyry anomaly on the Bayi Ranch exploration license area from 2012 geochemistry analysis

The following table shows the exploration expenditures expensed and capitalized during the years ended December 31, 2012 and December 31, 2011.

MANAGEMENT'S DISCUSSION AND ANALYSIS

	Jiama Mine	
	Year ended December 31,	
	2012	2011
	US\$	US\$
Exploration expensed	–	–
Exploration capitalized	8,840,155	15,396,450
	8,840,155	15,396,450

LIQUIDITY AND CAPITAL RESOURCES

The Company operates in a capital intensive industry. The Company's liquidity requirements arise principally from the need for working capital to finance the expansion of its mining and processing operations, exploration activities and acquisition of exploration and mining rights. The Company's principal sources of funds have been proceeds from borrowing from commercial banks in China, equity financings, and cash generated from operations. The Company's liquidity primarily depends on its ability to generate cash flow from its operations and to obtain external financing to meet its debt obligations as they become due, as well as the Company's future operating and capital expenditure requirements.

At December 31, 2012, the Company had an accumulated surplus of US\$107.2 million, working capital of US\$90.6 million and bank borrowings of US\$213 million. The Company's cash balance at December 31, 2012 was US\$181.7 million.

Management believes that its forecast operating cash flows are sufficient to cover the next twelve months of the CSH and Jiama Mines' operations including its planned capital expenditures and current debt repayments. Revenue and related expenses should increase as production increases after completion of the planned expansions. Some of the Company's available cash will be used to fund capital expenditures planned for Phase II expansion at the Jiama Mine as well as other business expenses. The Company also is in advanced discussions to arrange project debt financing to support expansion of the Jiama Mine. The CSH Mine's expansion will be funded by cash generated from its existing operations.

Cash flows

The following table sets out selected cash flow data from the Company's consolidated cash flow statements for the periods ended December 31, 2012 and December 31, 2011.

	Year ended	
	December 31,	
	2012	2011
	US\$'000	US\$'000
Net cash from operating activities	90,785	115,604
Net cash used in investing activities	(235,140)	(71,032)
Net cash from (used in) financing activities	(29,961)	5,727
Net increase (decrease) in cash and cash equivalents	(174,316)	50,299
Effect of foreign exchange rate changes on cash and cash equivalents	1,743	2,405
Cash and cash equivalents, beginning of period	354,313	301,609
Cash and cash equivalents, end of period	181,740	354,313

MANAGEMENT'S DISCUSSION AND ANALYSIS

Operating cash flow

For the year ended December 31, 2012, net cash inflow from operating activities was US\$90.8 million which was primarily attributable to (i) profit before income tax of US\$99.7 million, (ii) depreciation and depletion of US\$24.9 million, (iii) amortization of intangible assets of US\$14.3 million and (iv) finance cost of US\$12.5 million, partially offset by (i) interest paid of US\$11.9 million, (ii) income tax paid of US\$40.4 million, (iii) an increase of US\$7.0 million in inventory and (iv) an increase in prepaid expenses and deposits of US\$3.5 million.

Investing cash flow

For the year ended December 31, 2012, net cash outflow from investing activities was US\$235.1 million, which was primarily attributable to available-for-sale investments of US\$20.0 million, the acquisition of property, plant and equipment of US\$174.9 million and the deposit paid for acquisition of property, plant and equipment of US\$40.2 million.

Financing cash flow

For the year ended December 31, 2012, net cash outflow from financing activities was US\$30.0 million, which is primarily attributable to the entrusted loan to CNG of US\$16.1 million and repayment of borrowings of US\$44.3 million, partially offset by proceeds from the bank loan of US\$27.5 million.

Gearing ratio

Gearing ratio is defined the ratio of consolidated total debt to consolidated total equity. As at December 31, 2012, the Company's total debt was US\$213 million and the total equity was US\$1,368 million. The Company's gearing ratio was 0.16 as at December 31, 2012 (the gearing ratio was 0.18 as at December 31, 2011).

Restrictive covenants

The Company is subject to various customary conditions and covenants under the terms of its financing agreements.

Under the loan agreement between the CSH CJV and the Agricultural Bank of China ("ABC"), the CSH CJV is prohibited from distributing dividends before repaying amounts due under the loan agreement in the same fiscal year. In addition, the CSH CJV is required to obtain the lender's consent prior to carrying out certain activities or entering into certain transactions such as a reduction of registered capital, disposal of assets, mergers and acquisitions and provision of guarantee or creating charges over its material assets in favor of third-parties. The ABC loan is secured by the relevant mining rights of the CSH Mine.

Under the loan agreements between Jiama and the Bank of China ("BOC") and between Jiama and the various banks providing the syndicated loan facility, Jiama is prohibited from distributing dividends before offsetting accumulated losses of the prior accounting year, repaying the principal, interest, and other expenses due under the loan agreement in the current fiscal year, and repaying the principal, interest and other expenses due under the loan agreement in the next fiscal year. In addition, Jiama is required to obtain the lender's written approval prior to reducing registered capital, processing one or more transactions or a series of transactions in the form of a sale, lease, transfer or other way leading to the disposal of assets that together total over RMB5.0 million, entering into any merger or acquisition, providing a guarantee or creating charges over its material assets in favor of third parties. The BOC and Syndicate loan facility are secured by the relevant mining rights and assets of the Jiama Mine.

Acquisition of Shares in China Nonferrous Mining Corporation Limited

The Company subscribed for a total of 70,545,000 shares of China Nonferrous Mining Corporation Limited ("CNMC") for an aggregate price of US\$20,010,702 (HK\$155,199,000) in CNMC's initial global offering and listing on the HKSE (stock code: 1258) on June 29, 2012. CNMC is a copper producer based in Zambia, focusing on mining, ore processing, leaching, smelting and the sale of copper. It is incorporated in Hong Kong with limited liability. This transaction complies with the Company's prospectus (the "Prospectus") in relation to the Company's global offering and listing on the HKSE in 2010 (the "Global Offering"), which states that approximately 30% of the proceeds from the offering are to be allocated for potential acquisition of gold and non-ferrous mineral resources outside of China.

Investment in Inner Mongolia Chengxin Yong'an Chemical Co., Ltd

The Company entered into an agreement with Hebei Chengxin Ltd, the largest sodium cyanide manufacture in Asia to establish a joint venture. The joint venture, Inner Mongolia Chengxin Yong'an Chemical Co., Ltd ("Yong'an Chemical"), is incorporated in the PRC. By using the cash generated from its existing operations, the Company will invest RMB35 million (approximately US\$5.6 million) representing a 10% interest in the joint venture. On November 28, 2012, the Company invested RMB5 million (approximately US\$803,000) in accordance with the agreement.

Upon its completion in 2013, the joint venture will produce the sodium cyanide, a key reagent for heap leaching processing, and will satisfy the increasing demand of sodium cyanide in the gold production at the CSH mine with lower procurement costs.

Change of Use of Proceeds

As stated in the section headed "Future Plans and Use of Proceeds" of the Prospectus, the Company intended to use approximately 30% of the net proceeds from its Global Offering for potential acquisition of gold and non-ferrous mineral resources outside of China by focusing on mines at operating stages and advanced mining or exploration projects with high growth prospect. As at December 31, 2012, the aforesaid 30% net proceeds (approximately HK\$631.6 million or US\$81.4 million) have not been used, except for HK\$155 million (equivalent to US\$20 million) which has been used for the acquisition of a total of 70,545,000 shares of CNMC.

The production expansion of the Jiama Mine is integral to the strategic development and growth of the Company. In line with this organic development strategy, to enable the further production expansion at the Jiama Mine to 40,000 tpd as described in the Jiama Expansion Pre-Feasibility, the Company has applied US\$50 million (equivalent to HK\$388 million) of the 30% net proceeds to increase the capitalization of the Company's subsidiary that owns the Jiama Mine in anticipation of the expansion of production facilities at the Jiama mine.

Entrustment Loan Agreement

On October 18, 2012, Inner Mongolia Pacific entered into an entrustment loan agreement with CNG and the head office of ABC, pursuant to which Inner Mongolia Pacific will provide an entrustment loan in the sum of RMB100 million (approximately US\$16 million) to CNG through ABC as the entrusted bank. The term of the Entrustment Loan is six months and it carries an interest rate announced by the People's Bank of China for the equivalent duration. The principal of the loan shall be repaid at maturity.

COMMITMENTS AND CONTINGENCIES

Commitments and contingencies include principal payments on the Company's bank loans and syndicated loan facility, material future aggregate minimum operating lease payments required under the operating leases and capital commitments in respect of the future acquisition of property, plant and equipment and construction for both the CSH Mine and the Jiama Mine.

The Company has leased certain properties in China and Canada, which are all under operating lease arrangements and are negotiated for terms of between one and seventeen years. The Company is required to pay a fixed rental amount under the terms of these leases.

The Company's capital commitments relate primarily to the payments for purchase of equipment and machinery for both mines and payments to third-party contractors for the provision of mining and exploration engineering work and mine construction work for both mines. The Company has entered into contracts that prescribe such capital commitments; however, liabilities relating to them have not yet been incurred. Therefore, capital commitments are not included in the Company's consolidated financial statements.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following table outlines payments for commitments for the periods indicated:

	Total US\$'000	Payment Due by Period	Within two	Over five years
		Within one year US\$'000	to five years US\$'000	US\$'000
Principal repayment of bank loans	212,929	72,234	60,435	80,260
Operating lease commitments (a)	3,514	1,908	864	742
Capital commitments (b)	175,840	175,840	–	–
Total	392,283	249,982	61,299	81,002

(a) Operating leases are primarily for premises and production.

(b) Capital commitments relate to contracts signed for construction and equipment supply.

In addition to the table set forth above, the Company has entered into service agreements with third-party contractors such as China Railway and China Metallurgical for the provision of mining and exploration engineering work and mine construction work for the CSH Mine. The fees for such work performed and to be performed each year varies depending on the amount of work performed. The Company has similar agreements with third party contractors for the Jiama Mine.

RELATED PARTY TRANSACTIONS

CNG owned 39.3 percent of the outstanding common shares of the Company as at December 31, 2012 and at December 31, 2011.

The Company had major related party transactions with the following companies, related by way of shareholders and shareholder in common:

On October 24, 2008, the Company's subsidiary, Inner Mongolia Pacific entered into a non-exclusive contract for the purchase and sale of doré with CNG (the "2008 Contract") pursuant to which Inner Mongolia Pacific sold gold doré bars to CNG from time to time through to December 31, 2011, with pricing referenced to the daily average price of Au9995 gold ingot as quoted on the Shanghai Gold Exchange and the daily average price of No. 2 silver as quoted on the Shanghai Huatong Platinum & Silver Exchange prevailing at the time of each relevant purchase order during the contract period. On January 27, 2012, Inner Mongolia Pacific entered into a contract for purchase and sale of doré with CNG for the purpose of regulating the sale and purchase of gold doré to be carried out between them for the three years ending December 31, 2012, 2013 and 2014 on the same pricing terms as the 2008 Contract. Revenue from sales of gold doré bars to CNG increased from US\$205 million for the year ended December 31, 2011 to US\$220 million for the year December 31, 2012. For the year ended December 31, 2012, construction services of US\$77 million were provided to the Group by subsidiaries of CNG.

On November 6, 2012, the Company announced that the Board of Directors approved the proposed connected transaction contracts with subsidiaries of CNG for expansions at Jiama and CSH with total aggregate fees of approximately RMB986 million (equivalent to approximately US\$156 million) and a continuing connected transactions contract with CNG with annual caps for the three years ending December 31, 2012, 2013 and 2014 of RMB630 million (equivalent to approximately US\$100 million), RMB960 million (equivalent to approximately US\$152 million) and RMB290 million (equivalent to approximately US\$46 million), respectively. The Company held an extraordinary shareholder meeting on December 20, 2012 in Vancouver and its independent shareholders approved the connected transaction and continuing connected transactions contracts pursuant to Chapter 14A of the HKEx listing rules.

In addition to the two aforementioned major related party transactions, the Company also obtains additional services from related parties in its normal course of business. Further detailed information regarding such services is disclosed in the Company's annual directors' report.

PROPOSED TRANSACTIONS

The Company is in the process of closing Gansu Pacific Mining Ltd., a subsidiary in China, subsequent to the disposal of the exploration permit of Gansu Pacific Mining Ltd. in October 2011.

The Board of Directors has given the Company approval to conduct reviews of a number of projects that may qualify as acquisition targets through joint venture, merger and/or outright acquisitions.

CRITICAL ACCOUNTING ESTIMATES

In the process of applying the Company's accounting policies, the Directors of the Company have identified accounting judgments and key sources of estimation uncertainty that have a significant effect on the amounts recognized in the audited annual consolidated financial statements.

Key assumptions concerning the future and other key sources of estimation uncertainty at the end of each reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next twelve months are described in Note 4 of the audited annual consolidated financial statements for the year ended December 31, 2012.

CHANGE IN ACCOUNTING POLICIES

A summary of new and revised IFRS standards and interpretations are outlined in Note 3 of the audited annual consolidated financial statements as at December 31, 2012.

FINANCIAL INSTRUMENTS AND OTHER INSTRUMENTS

The Company holds a number of financial instruments, the most significant of which are investments, accounts receivable, accounts payable, cash and loans. The financial instruments are all recorded at fair values on the balance sheet.

The company did not have any derivatives as at December 31, 2012.

OFF-BALANCE SHEET ARRANGEMENTS

As at December 31, 2012, the Company had not entered into any material off-balance sheet arrangements.

DIVIDEND AND DIVIDEND POLICY

The Company has not paid any dividends since incorporation and does not currently have a fixed dividend policy. The Directors will determine any future dividend policy on the basis of, among others things, the results of operations, cash flows and financial conditions, operating and capital requirements, the amount of distributable profits and other relevant factors.

Subject to the British Columbia Business Corporations Act, the Directors may from time to time declare and authorize payment of such dividends as they may deem advisable, including the amount thereof and the time and method of payment provided that the record date for the purpose of determining shareholders entitled to receive payment of the dividend must not precede the date on which the dividend is to be paid by more than two months.

A dividend may be paid wholly or partly by the distribution of cash, specific assets or of fully paid shares or of bonds, debentures or other securities of the Company, or in any one or more of those ways. No dividend may be declared or paid in money or assets if there are reasonable grounds for believing that the Company is insolvent or the payment of the dividend would render the Company insolvent.

MANAGEMENT'S DISCUSSION AND ANALYSIS

OUTSTANDING SHARES

As of December 31, 2012, the Company had 396,318,753 common shares issued and outstanding.

DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for the design of disclosure controls and procedures ("DC&P") and the design of internal control over financial reporting ("ICFR") to provide reasonable assurance that material information relating to the Company, including its consolidated subsidiaries, is made known to the Company's certifying officers. The Company's Chief Executive Officer and Chief Financial Officer have each evaluated the Company's DC&P and ICFR as of December 31, 2012 and, in accordance with the requirements established under Canadian National Instrument 52-109 – Certification of Disclosure in Issuer's Annual and Interim Filings, the Chief Executive Officer and Chief Financial Officer have concluded that these controls and procedures were effective as of December 31, 2012, and provide reasonable assurance that material information relating to the Company is made known to them by others within the Company and that the information required to be disclosed in reports that are filed or submitted under Canadian securities legislation are recorded, processed, summarized and reported within the time period specified in those rules.

The Company's Chief Executive Officer and Chief Financial Officer have used the Committee of Sponsoring Organizations of the Treadway Commission (COSO) framework to evaluate the Company's ICFR as of December 31, 2012 and have concluded that these controls and procedures were effective as of December 31, 2012 and provide reasonable assurance that financial information is recorded, processed, summarized and reported in a timely manner. Management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. The result of the inherent limitations in all control systems means design of controls cannot provide absolute assurance that all control issues and instances of fraud will be detected. During the year ended December 31, 2012, there were no changes in the Company's DC&P or ICFR that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

RISK FACTORS

There are certain risks involved in the Company's operations, some of which are beyond the Company's control. Aside from risks relating to business and industry, the Company's principal operations are located within the People's Republic of China and are governed by a legal and regulatory environment that in some respects differs from that which prevails in other countries. Readers of this MD&A should give careful consideration to the information included in this document and the Company's audited annual consolidated financial statements and related notes. Significant risk factors for the Company are metal prices, government regulations, foreign operations, environmental compliance, the ability to obtain additional financing, risk relating to recent acquisitions, dependence on management, title to the Company's mineral properties, and litigation. China Gold International's business, financial condition or results of operations could be materially and adversely affected by any of these risks. For details of risk factors, please refer to the Company's annual audited consolidated financial statements, and Annual Information Form filed from time to time on SEDAR at www.sedar.com.

QUALIFIED PERSON

Disclosure of a scientific or technical nature in this section of the MD&A in respect of updates at the CSH Gold Project was prepared by or under the supervision of Mr. John Nilsson, P.Eng., of Nilsson Mine Services Ltd. and Mr. Songlin Zhang, each a qualified person for the purposes of NI 43-101.

Disclosure of a scientific or technical nature in this MD&A in respect of the Jiama Mine for the Mineral Resources, Mineral Reserves and Phase II Expansion was prepared by or under the supervision of Mr. Songlin Zhang, a qualified person for the purposes of NI 43-101.

Notes:

- Amounts represent equity reserve arising from share-based compensation provided to directors and employees during the years ended December 31, 2012 and 2011.
- Amounts represent reserves arising from share-based compensation provided to directors and employees, and deemed contribution from shareholders in previous years.
- Statutory reserve which consists of appropriations from the profit after taxation of the subsidiaries established in the People's Republic of China ("PRC"), forms part of the equity of the PRC subsidiaries. In accordance with the PRC Company Law and the Articles of Association of the PRC subsidiaries, these PRC subsidiaries are required to appropriate an amount equal to a minimum of 10% of their profits after taxation each year to a statutory reserve.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

1. GENERAL

China Gold International Resources Corp. Ltd., formerly known as Jinshan Gold Mines Inc., (the “Company”) is a publicly listed company incorporated in British Columbia on May 31, 2000 with limited liability under the legislation of the Province of British Columbia and its shares are listed on the Toronto Stock Exchange (“TSX”) and The Stock Exchange of Hong Kong Limited (the “Stock Exchange”). The Company together with its subsidiaries (collectively referred to as the “Group”) is principally engaged in the acquisition, exploration, development and mining of mineral reserves in the PRC. Particulars of the subsidiaries of the Company are set out in Note 36. The Group considers that China National Gold Group Corporation (“CNG”), a state owned company registered in Beijing, PRC which is controlled by State-owned Assets Supervision and Administration Commission of the State Council of the PRC, is able to exercise significant influence over the Company.

The head office, principal address and registered and records office of the Company are located at Suite 1030, One Bentall Centre, 505 Burrard Street, Vancouver, British Columbia, Canada, V7X 1M5.

The consolidated financial statements are presented in United States Dollars (“US\$”) which is the functional currency of the Company.

2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRSs”)

In the current year, the Group has applied the following new and revised IFRSs issued by the International Accounting Standard Board and IFRS Interpretations Committee which are effective for the financial year beginning January 1, 2012:

Amendments to IFRS 7	Financial Instruments: Disclosures – Transfers of Financial Assets
Amendments to IAS 12	Deferred Tax – Recovery of Underlying Assets

The application of the new or revised IFRSs in the current year has had no material impact on the Group’s financial performance and positions for the current and prior years and/or on disclosures set out in these consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRSs”) (Cont’d)

The Group has not early applied the following new or revised IFRSs that have been issued but are not yet effective:

Amendments to IFRSs	Annual Improvements to IFRSs 2009-2011 Cycle ¹
Amendments to IFRS 7	Disclosures – Offsetting Financial Assets and Financial Liabilities ¹
Amendments to IFRS 9 and IFRS 7	Mandatory Effective Date of IFRS 9 and Transition Disclosures ²
Amendments to IFRS 10, IFRS 11 and IFRS 12	Consolidated Financial Statements, Joint Arrangements and Disclosure of Interests in Other Entities: Transition Guidance ¹
Amendments to IFRS 10, IFRS 12 and IAS 27	Investment Entities ³
IFRS 9	Financial Instruments ²
IFRS 10	Consolidated Financial Statements ¹
IFRS 11	Joint Arrangements ¹
IFRS 12	Disclosure of Interests in Other Entities ¹
IFRS 13	Fair Value Measurement ¹
IAS 19 (Revised 2011)	Employee Benefits ¹
IAS 27 (Revised 2011)	Separate Financial Statements ¹
IAS 28 (Revised 2011)	Investments in Associates and Joint Ventures ¹
Amendments to IAS 1	Presentation of Items of Other Comprehensive Income ⁴
Amendments to IAS 22	Offsetting Financial Assets and Financial Liabilities ³
IFRIC 20	Stripping Costs in the Production Phase of a Surface Mine ¹

¹ Effective for annual periods beginning on or after January 1, 2013

² Effective for annual periods beginning on or after January 1, 2015

³ Effective for annual periods beginning on or after January 1, 2014

⁴ Effective for annual periods beginning on or after July 1, 2012

Except as described below, the application of the new and revised IFRSs has had no material impact on the Group’s financial performance and positions for the current and prior years and/or on the disclosures set out in these consolidated financial statements.

Amendments to IAS 1 Presentation of Items of Other Comprehensive Income

The amendments to IAS 1 *Presentation of Items of Other Comprehensive Income* introduce new terminology for the statement of comprehensive income. Under the amendments to IAS 1, a ‘statement of comprehensive income’ is renamed as a ‘statement of profit or loss and other comprehensive income’. In addition, the amendments to IAS 1 require items of other comprehensive income to be grouped into two categories: (a) items that will not be reclassified subsequently to profit or loss; and (b) items that may be reclassified subsequently to profit or loss when specific conditions are met. Income tax on items of other comprehensive income is required to be allocated on the same basis – the amendments do not change the option to present items of other comprehensive income either before tax or net of tax.

The amendments to IAS 1 are effective for the Group for annual periods beginning on or after July 1, 2012. The presentation of items of other comprehensive income will be modified accordingly when the amendments are applied in the future accounting periods.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

2. APPLICATION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS (“IFRSS”) (Cont’d)

IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine

IFRIC 20 *Stripping Costs in the Production Phase of a Surface Mine* applies to waste removal costs that are incurred in surface mining activity during the production phase of the mine (“production stripping costs”). Under the Interpretation, the costs from this waste removal activity (“stripping”) which provide improved access to ore is recognized as a non-current asset (“stripping activity asset”) when certain criteria are met. The stripping activity asset is accounted for as an addition to, or as an enhancement of, an existing asset and classified as tangible or intangible according to the nature of the existing asset of which it forms part.

IFRIC 20 is effective for annual periods beginning on or after January 1, 2013 with specific transitional provisions that are provided to entities that apply IFRIC 20 for the first time. The Group anticipates that the interpretation will be adopted in the Group’s consolidated financial statements for the annual period beginning January 1, 2013. Currently, stripping costs that are incurred to enhance the accessibility of the identified component of the ore are capitalized as part of mineral assets in the period incurred, when management determine that there is sufficient evidence that the expenditure will result in a probable future economic benefit to the Group. Mineral assets are depreciated using the unit-of-production method based on the estimated total recoverable ounces contained in proven and probable reserves at the related mines which may be different from that required by IFRIC 20, in which depreciation should be over the expected useful life of the identified component of the ore body that becomes more accessible as a result of the stripping activity. Identified component refers to the specific volume of the ore body that is made more accessible by the stripping activity. The Group is currently assessing the financial impact on the application of IFRIC 20.

3. SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance to IFRSs. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the Stock Exchange and by the Hong Kong Companies Ordinance.

The consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair values. Historical cost is generally based on the fair value of the consideration given in exchange for goods.

The principal accounting policies are set out below.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its controlled subsidiaries. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the effective date of acquisition and up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the Group.

All intra-company transactions, balances, income and expenses are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Group’s equity therein.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Basis of consolidation (Cont'd)

Allocation of total comprehensive income to non-controlling interests

Total comprehensive income and expense of a subsidiary is attributed to the owners of the Company and to the non-controlling interests even if the results in the non-controlling interests having a deficit balance.

Business combination

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognized in profit or loss as incurred.

At the acquisition date, the acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3 (2008) are recognized at their fair values, except that:

- deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognized and measured in accordance with IAS 12 *Income Taxes* and IAS 19 *Employee Benefits* respectively;
- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered to replace share-based payment arrangements of the acquiree are measured in accordance with IFRS 2 *Share-based Payment* at the acquisition date; and
- assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations* are measured in accordance with that standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after assessment, the Group's interest in the fair value of the acquiree's identifiable net assets exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in profit or loss as a bargain purchase gain.

Non-controlling interests may be initially measured either at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period which cannot exceed one year from the acquisition date, or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognized as of that date.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Interests in subsidiaries

Interests in subsidiaries are stated in the Company's statement of financial position at cost (including deemed capital contribution) less subsequent accumulated impairment losses, if any.

Investments in associates

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting. Under the equity method, investments in associates are initially recognized in the consolidated statement of financial position at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associates. When the Group's share of losses of an associate exceeds the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of that associate.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an associate recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment.

Any excess of the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

The requirements of IAS 39 are applied to determine whether it is necessary to recognize any impairment loss with respect to the Group's investment in an associate. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with IAS 36 *Impairment of Assets* as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized in accordance with IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

Upon disposal of an associate that results in the Group losing significant influence over that associate, any retained investment is measured at fair value at that date and the fair value is regarded as its fair value on initial recognition as a financial asset in accordance with IAS 39. The difference between the previous carrying amount of the associate attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the associate. In addition, the Group accounts for all amounts previously recognized in other comprehensive income in relation to that associate on the same basis as would be required if that associate had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognized in other comprehensive income by that associate would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when it loses significant influence over that associate.

When a group entity transacts with its associate, profits and losses resulting from the transactions with the associate are recognized in the Group's consolidated financial statements only to the extent of interests in the associate that are not related to the Group.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable and represents amounts receivable for goods sold in the normal course of business, net of discounts and sales related taxes.

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts the estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

Foreign currencies

In preparing the financial statements of each individual group entity, transactions in foreign currencies are initially recorded in the entity's functional currency at the exchanges prevailing on the dates of the transactions. At the end of the reporting period, monetary assets and liabilities denominated in foreign currencies are retranslated at the rates prevailing at that date.

Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

All gains and losses on translation of these foreign currency transactions are included in profit or loss.

For the purposes of presenting the consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. US\$) at the rate of exchange prevailing at the end of the reporting period, and their income and expenses are translated at the average exchange rates for the year. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity (the translation reserve).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Share-based payments

The Company grants stock options to directors and employees to acquire common shares of the Company. The Company grants such options for periods of up to six years, with vesting periods determined at its sole discretion and at prices equal to the weighted average price of the common shares for the five days immediately preceding the date the options were granted.

The fair value of the options is measured at grant date, using the Black-Scholes option pricing model, and is recognized over the vesting period that the employees earn the options. The fair value is recognized as an expense with a corresponding increase in equity. The amount recognized as expense is adjusted to reflect the number of share options expected to vest.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

Taxation

Income tax expense represents the sum of the current tax charge and the movement in deferred tax.

The tax currently payable is based on taxable income for the period. Taxable profit differs from profit as reported in the consolidated statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognized on temporary differences between the carrying amount of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary difference to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary differences arise from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences associated with investment in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets arising from deductible temporary differences associated with such investments are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary difference and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Taxation (Cont'd)

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized, based on tax rate (and tax laws) that have been enacted or substantially enacted by the end of the reporting period. Current and deferred tax is recognized in profit or loss, except when it relates to items recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the Group intends to settle its current tax assets and liabilities on a net basis.

Government grants

Government grants are not recognized until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Group recognizes as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognized as deferred income in the consolidated statement of financial position and transferred to profit or loss over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognized in profit or loss in the period in which they become receivable.

Retirement benefit costs

Payments made to state-managed retirement benefit scheme are charged as expenses when employees have rendered service entitling them to the contributions.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Cash and cash equivalents

Cash and cash equivalents comprise cash at banks and on hand, and short-term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash.

Prepaid lease payments

Prepaid lease payments representing land use rights in the PRC are stated at cost and amortized on a straight-line basis over the lease terms. Prepaid lease payments which are to be amortized in the next twelve months or less are classified as current assets.

Inventory

Inventories are stated at the lower of cost and net realizable value. Cost is calculated using weighted average method. Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Gold in process inventory consists of gold contained in the ore on leach pads and in-circuit material within processing operations. Gold doré bar is gold awaiting refinement and gold refined and ready for sales.

Gold in process inventory

Production costs are capitalized and included in gold in process inventory based on the current mining and processing cost incurred up to the point prior to the refining process including the cost of raw materials and direct labour; mine-site overhead expenses; stripping costs; and allocated indirect costs, including depreciation and depletion of mining interests.

Gold doré bars inventory

The recovery of gold from ore is achieved through a heap leaching process. Under this method, ore is placed on leach pads where it is treated with a chemical solution which dissolves the gold contained in the ore. The resulting "pregnant" solution is further processed in a plant where the gold is recovered. Costs are subsequently recycled from ore on leach pads as ounces of gold are recovered based on the average cost per recoverable ounce on the leach pad. Estimates of recoverable gold on the leach pads are calculated from the quantities of ore placed on the leach pads (measured in tonnes added to the leach pads), the grade of the ore placed on the leach pads (based on assay data), and a recovery percentage (based on ore type).

Copper inventory is copper concentrate after metallurgical processing and ready for sales.

Consumables used in operations, such as fuel, chemicals, and reagents and spare parts inventory are valued at the lower of cost or net realizable value.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Property, plant and equipment

General

Property, plant and equipment are recorded at cost less accumulated depreciation, depletion and impairment charges.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

Expenditures incurred to replace a component of an item of property, plant and equipment that is accounted for separately, including major inspection and overhaul expenditures, are capitalized and the carrying amount of the component being replaced is derecognized. Directly attributable costs incurred for major capital projects and site preparation are capitalized until the asset is brought to a working condition for its intended use. These costs include dismantling and site restoration costs to the extent these are recognized as a provision.

Management reviews the estimated useful lives, residual values and depreciation methods of the Group's property, plant and equipment at the end of each reporting period and when events and circumstances indicate that such a review should be made. Changes to estimated useful lives, residual values or depreciation methods resulting from such review are accounted for prospectively.

All direct costs related to the acquisition of mineral assets are capitalized, at their cost at the date of acquisition.

Exploration and evaluation expenditure

Drilling and related costs incurred on sites without an existing mine and on areas outside the boundary of a known mineral deposit which contains proven and probable reserves are exploration and evaluation expenditure and are expensed as incurred up to the date on which costs incurred are economically recoverable. Further exploration and evaluation expenditures, subsequent to the establishment of economic recoverability, are capitalized and included in the carrying amount of the mineral assets.

Management evaluates the following criteria in its assessments of economic recoverability and probability of future economic benefit:

- Geology – whether or not there is sufficient geologic and economic certainty of being able to convert a residual mineral deposit into a proven and probable reserve at a development stage or production stage mine, based on the known geology and metallurgy. A history of conversion of resources to reserves at operating mines to support the likelihood of conversion.
- Scoping – there is a scoping study or preliminary feasibility study that demonstrates the additional resources will generate a positive commercial outcome. Known metallurgy provides a basis for concluding there is a significant likelihood of being able to recoup the incremental costs of extraction and production.
- Accessible facilities – mining property can be processed economically at accessible mining and processing facilities where applicable.
- Life of mine plans – an overall life of mine plan and economic model to support the mine and the economic extraction of resources/reserves exists. A long-term life of mine plan, and supporting geological model identifies the drilling and related development work required to expand or further define the existing orebody.
- Authorizations – operating permits and feasible environmental programs exist or are obtainable.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Property, plant and equipment (Cont'd)

Exploration and evaluation expenditure (Cont'd)

Therefore prior to capitalizing exploration drilling and related costs, management determines that the following conditions have been met that will contribute to future cash flows:

- There is a probable future benefit that will contribute to future cash inflows;
- The Group can obtain the benefit and controls access to it;
- The transaction or event giving rise to the future benefit has already occurred; and
- Costs incurred can be measured reliably.

Development expenditure

Drilling and related costs incurred to define and delineate a mineral deposit are capitalized as part of mineral assets in the period incurred, when management determines that there is sufficient evidence that the expenditure will result in a probable future economic benefit to the Group.

Production expenditure

Capitalization of costs incurred ceases when the related mining property has reached the condition necessary for it to be capable of operating in the manner intended by management, therefore, such costs incurred are capitalized as part of the mineral assets and the proceeds from sales prior to commissioning are offset against costs capitalized.

Mine development costs incurred to maintain current production are included in profit or loss. For those areas being developed which will be mined in future periods, the costs incurred are capitalized and depleted when the related mining area is mined.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Property, plant and equipment (Cont'd)

Depreciation

Mineral assets are depreciated using the unit-of-production method based on the estimated total recoverable ounces contained in proven and probable reserves at the related mine.

Management reviews the estimated total recoverable ounces contained in proven and probable reserves at the end of each reporting period and when events and circumstances indicate that such a review should be made. Changes to estimated total recoverable ounces contained in proven and probable reserves are accounted for prospectively.

Assets under construction are not depreciated until they are substantially complete and available for their intended use.

Leasehold improvements are depreciated over the shorter of the lease term and the estimated useful lives of the assets.

Mining rights

Mining rights are depreciated using the unit-of-production method based on the estimated total recoverable ounces contained in proven and probable reserves at the related mine.

Mining rights acquired in a business combination

Mining rights acquired in a business combination are recognized separately from goodwill and are initially recognized at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, mining rights with finite useful lives are carried at costs less accumulated amortization and any accumulated impairment losses. Amortization is provided using the unit of production method based on the actual production volume over the estimated total proven and probable reserves of the ore mines.

Impairment of tangible assets and mining rights

At the end of the reporting period, the Group reviews the carrying amounts of its tangible assets and mining rights to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or a cash-generating unit) in prior years.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Financial instruments

The Group's financial assets and liabilities are recognized in the consolidated statement of financial position when a group entity becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and liabilities (other than financial assets) are added to or deducted from the fair value of financial assets or financial liabilities, as appropriate, on initial recognition.

Financial assets

The Group's financial assets are classified as loans and receivables. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Effective interest method

The effective interest method calculates the amortized cost of a financial asset and allocates interest income over the corresponding period. The effective interest rate is the rate that discounts estimated future cash receipts over the expected life of the financial asset, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Interest income is recognized on an effective interest basis for debt instruments.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with maturities greater than twelve months or those that are expected to be settled after twelve months from the end of the reporting period, which are classified as non-current assets. Assets in this category include "accounts receivable", "entrusted loan receivable", "cash and cash equivalents", and "amount due from a non-controlling shareholder" (included other receivables).

Loans and receivables are initially recognized at fair value plus transaction costs and subsequently carried at amortized cost using the effective interest method, except for short-term receivables when the recognition of interest would be immaterial.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated or not classified as financial assets at fair value through profit or loss, loans and receivables or held-to-maturity investments.

Available-for-sale financial assets are measured at fair value at the end of each reporting period. Changes in fair value are recognized in other comprehensive income and accumulated in investment revaluation reserve, until the financial asset is disposed of or is determined to be impaired, at which time, the cumulative gain or loss previously accumulated in the investment revaluation reserve is reclassified to profit or loss.

Impairment of financial assets

Financial assets are assessed for indicators of impairment at the end of the reporting period. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

Objective evidence of impairment could include the following:

- Significant financial difficulty of the issuer or counterparty;
- Default or delinquency in interest or principal payments; or
- It has become probable that the borrower will enter bankruptcy or financial reorganization.

Trade receivables (included in accounts receivable) assessed not to be impaired individually are subsequently assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 180 days, observable changes in national or local economic conditions that correlate with default on receivables.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Financial instruments (Cont'd)

Financial assets (Cont'd)

Impairment of financial assets (Cont'd)

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of all financial assets, excluding trade receivables, is directly reduced by the impairment loss. The carrying amount of trade receivable is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to profit or loss.

For financial assets measured at amortized cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment losses were recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

For an available-for-sale equity investment, a significant or prolonged decline in the fair value of that investment below its cost is considered to be objective evidence of impairment.

When an available-for-sale financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss in the period in which the impairment takes place.

Impairment losses on available-for-sale equity investments will not be reversed through profit or loss. Any increase in fair value subsequent to impairment loss is recognized directly in other comprehensive income and accumulated in investment revaluation reserve.

Derecognition of financial assets

Financial assets are derecognized when the rights to receive cash flows from the assets expire or the financial assets are transferred and the Group has transferred substantially all the risks and rewards of ownership of the financial assets. On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable.

Financial liabilities and equity instruments

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the group entities are recorded at the proceeds received, net of direct issue costs. Equity instruments issued in a business combination are recorded at their fair value at the acquisition date.

Effective interest method

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expenses over the corresponding period. The effective interest rate is the rate that exactly discounts estimated future cash payments over the expected life of the financial liability, or, where appropriate, a shorter period.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Financial instruments (Cont'd)

Financial liabilities and equity instruments (Cont'd)

Financial liabilities

Financial liabilities, including borrowings and accounts payable and accrued expenses excluding advance from customers, other tax payables and accruals, are initially measured at fair value, net of transaction costs, and are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

Derecognition of financial liabilities

For financial liabilities, they are derecognized when the obligation specified in the relevant contract is discharged, cancelled or expires. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

Environmental rehabilitation

An obligation to incur restoration, rehabilitation and environmental costs arises when environmental disturbance is caused by the development or ongoing production of a mining property. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized as part of the related property, plant and equipment at the start of each project, as soon as the obligation to incur such costs arises. These costs are recognized in profit or loss over the life of the operation, through the depreciation of the asset. Costs for restoration of subsequent site damage which is created on an ongoing basis during production are provided for at their net present values and recognized in profit or loss as extraction progresses.

Changes in the measurement of a liability relating to the decommissioning of plant or other site preparation work that result from changes in the estimated timing or amount of the cash flow, including the effects of inflation and movements in foreign exchange rates, revisions to estimated reserves, resources and lives of operations, or a change in the discount rate, are added to, or deducted from, the cost of the related asset in the period it occurred. The periodic unwinding of discount is recognised in profit or loss as a finance cost as it occurs. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognized immediately in profit or loss. If the asset value is increased and there is an indication that the revised carrying value is not recoverable, an impairment test is performed in accordance with the Group's accounting policy.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

3. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

Leases

Leases are classified as finance lease whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating lease.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis.

Leasehold land and building

When a lease includes both land and building elements, the Group assesses the classification of each element as a finance or an operating lease separately based on the assessment as to whether substantially all the risks and rewards incidental to ownership of each element have been transferred to the Group unless it is clear that both elements are operating leases in which case the entire lease is classified as an operating lease. Specifically, the minimum lease payments (including any lump-sum upfront payments) are allocated between the land and the building elements in proportion to the relative fair values of the leasehold interests in the land element and building element of the lease at the inception of the lease.

To the extent the allocation of the lease payments can be made reliably, interest in leasehold land that is accounted for as an operating lease is presented as "prepaid lease payments" in the consolidated statement of financial position and is amortized over the lease term on a straight-line basis.

4. KEY SOURCES OF ESTIMATION UNCERTAINTY

In the process of applying the Group's accounting policies, which are described in Note 3, the Group has identified the following key sources of estimation uncertainty that have significant effect on the amounts recognized in the consolidated financial statements.

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of each reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next twelve months, are discussed below.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

4. KEY SOURCES OF ESTIMATION UNCERTAINTY (Cont'd)

(a) Inventories

The Group records the cost of gold mining ore placed on its leach pads and in process at its mine as gold in process inventory, and values gold in process inventory at the lower of cost and estimated net realizable value. The assumptions used in the valuation of gold in process inventories include estimates of gold contained in the ore placed on leach pads, assumptions of the amount of gold that is expected to be recovered from the ore placed on leach pads, and the amount of gold in the process plant and an assumption of the gold price expected to be realized when the gold is recovered. If these estimates or assumptions prove inaccurate, the Group could be required to write down the recorded value of its gold in process inventories.

Although the quantities of recoverable gold placed on the leach pad are reconciled by comparing the grades of ore placed on the leach pad to the quantities actually recovered, the nature of the leaching process inherently limits the ability to precisely monitor inventory levels. The actual recovery of gold from the leach pad is not known until the leaching process has concluded at the end of the mine life.

The management of the Group (the "Management") periodically reassesses the assumptions used in the valuation of gold in process and the costing of production of gold doré bars, particularly the assumptions of the amount of gold that is expected to be recovered from the ore placed on leach pads (the "Estimated Recovery Rate"). As a result of such reassessments, an increase/decrease in the Estimated Recovery Rate led to a decrease/increase in the average production cost of gold doré bars.

The carrying amount of gold in process as at December 31, 2012 is US\$26,192,000 (December 31, 2011: US\$23,408,000). The carrying amount of gold doré bars as at December 31, 2012 is US\$4,127,000 (December 31, 2011: US\$8,506,000).

(b) Property, plant and equipment

The Group's property, plant and equipment is depreciated and amortized on either a unit-of-production basis or straight-line method over their estimated useful lives. Under the unit-of-production method, the calculation of depreciation of property, plant and equipment is based on the amount of reserves expected to be recovered from the mine, as included in the technical report prepared by an independent valuer and the assumption that the Group is able to renew the mining rights without significant cost until the end of the mine's life. If these estimates of reserves prove to be inaccurate, or if the Group revises its mining plan, due to reductions in the metal price forecasts or otherwise, to reduce the amount of reserves expected to be recovered, the Group could be required to write down the recorded value of its property, plant and equipment, or to increase the amount of future depreciation and depletion expense.

The Group believes that it is able to renew the mining rights without significant cost until the end of the life of the mine. If the renewal of mining rights is unsuccessful, the Group could be required to write down the recorded value of its property, plant and equipment.

The carrying amount of property, plant and equipment as at December 31, 2012 is US\$517,115,000 (December 31, 2011: US\$361,061,000).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

4. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (Cont'd)

(c) Mining rights

The Group's mining rights in the Jiama polymetallic mineral property ("Jiama Mine"), are amortized on a unit-of-production basis over their estimated useful lives. Under the unit-of-production method, the calculation of amortization of mining rights is based on the amount of reserves expected to be recovered from the Jiama Mine as included in the technical report prepared by an independent valuer and the assumption is that the mining rights are renewable by the Group without significant cost until the end of the mine's life. If these estimates of reserves prove to be inaccurate, or if the Group revises its mining plan, due to reductions in the future prices of copper, lead and silver, or otherwise, to reduce the amount of reserves expected to be recovered, the Group could be required to write down the recorded value of its mining rights, or to increase the amount of future amortization expense.

The Group believes that it is able to renew the mining rights without significant cost until the end of the life of the mine. If the renewal of mining rights is unsuccessful, the Group could be required to write down the recorded value of its mining rights.

The carrying amount of mining rights as at December 31, 2012 is US\$948,232,000 (December 31, 2011: US\$962,004,000).

(d) Environmental rehabilitation

Environmental rehabilitation costs have been estimated based on the Group's interpretation of current regulatory requirements and have been measured at the net present value of expected future cash expenditure upon reclamation and closure. Environmental rehabilitation costs are capitalized as mineral assets costs and depreciated over the life of the mine. Because the fair value measurement requires the input of subjective assumptions, including the environmental rehabilitation costs, changes in subjective input assumptions can materially affect the estimate of the obligation.

During the year ended December 31, 2012, environmental rehabilitation costs were reduced by US\$698,000 due to a change in the discount rate (2011: reduction of US\$127,000 were made due to change in the discount rate), details of which are disclosed in Note 26.

The carrying amount of environmental rehabilitation costs as at December 31, 2012 is US\$6,813,000 (December 31, 2011: US\$4,253,000).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

5. GENERAL AND ADMINISTRATIVE EXPENSES

	2012 US\$'000	2011 US\$'000
Administration and office	11,500	5,470
Depreciation of property, plant and equipment	1,070	333
Investor relations	1,186	641
Professional fees	3,181	2,217
Salaries and benefits ⁽¹⁾	6,836	7,445
Shareholder information, transfer agent and filing fees	255	265
Travel	1,021	998
	<hr/>	<hr/>
Total general and administrative expenses	25,049	17,369

⁽¹⁾ Share-based compensation (a non-cash item) of approximately US\$99,000 (2011: US\$222,000) has been included in salaries and benefits for the year ended December 31, 2012.

6. EXPLORATION AND EVALUATION EXPENDITURE

	2012 US\$'000	2011 US\$'000
CSH Gold Mine (Note 21(a))	370	467
Generative exploration	20	—
	<hr/>	<hr/>
Total exploration and evaluation expenditure	390	467

7. FINANCE COSTS

	2012 US\$'000	2011 US\$'000
Effective interests on borrowings wholly repayable within 5 years	11,885	13,874
Accretion on environmental rehabilitation (Note 26)	664	179
	<hr/>	<hr/>
Total finance costs	12,549	14,053

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

8. INCOME TAX EXPENSE

The Company was incorporated in Canada and is subject to Canadian federal and provincial tax requirements which are calculated at 25% (2011: 26.5%) of the estimated assessable profit for the year ended December 31, 2012. Since its incorporation, the Company had no assessable profit subject to Canadian federal and provincial tax requirements.

PRC Enterprise Income Tax (“EIT”) is calculated at the prevailing tax rate of 25% on the estimated taxable profit of the group entities located in the PRC for the years ended December 31, 2012 (2011: 25%) except as described below.

Tibet Huatailong Mining Development Co. Ltd. (“Huatailong”) and Metrorkongka County Jiama Industry and Trade Co. (“Jiama Industry and Trade”), subsidiaries acquired in December 2010, were established in the westward development area of the PRC and subject to preferential tax rate of 15% of taxable profit.

Under relevant PRC Tax Law, withholding tax is imposed on dividends declared in respect of profits earned by the PRC subsidiaries from January 1, 2008 onwards. Deferred taxation has not been provided for in the consolidated financial statements in respect of temporary differences attributable to accumulated distributable profits of the PRC subsidiaries amounting to approximately US\$241,691,000 and US\$156,872,000 at December 31, 2012 and 2011, respectively, as the Company is able to control the timing of the reversal of temporary differences and it is probable the temporary differences will not reverse in the foreseeable future.

Taxation for other relevant jurisdictions is calculated at the rates prevailing in each of those jurisdictions respectively.

Tax expense comprises:

	2012 US\$'000	2011 US\$'000
Current tax expense – PRC EIT	34,701	28,735
Deferred tax expense	(8,538)	(6,215)
	<u>26,163</u>	<u>22,520</u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

8. INCOME TAX EXPENSE (Cont'd)

Per the consolidated statement of comprehensive income, the tax expense for the Group can be reconciled to the profit before income tax for the year as follows:

	2012 US\$'000	2011 US\$'000
Profit before income tax	99,677	104,483
PRC EIT tax rate	25%	25%
Tax at the PRC EIT tax rate	24,919	26,120
Tax effect of different tax rates of subsidiaries operating in other jurisdictions	—	(79)
Tax effect of concessionary tax rate	(564)	(911)
Tax effect of tax losses not recognized	415	485
Utilization of deductible temporary differences previously not recognized	—	(2,711)
Tax effect of non-deductible expenses	1,331	1,738
Tax effect of non-taxable income	—	(2,183)
Others	62	61
	<u>26,163</u>	<u>22,520</u>

The following are the major deferred tax (assets) liabilities recognized and movements thereon during the current and prior years:

	Property, Plant and equipment US\$'000	Environmental rehabilitation US\$'000	Mining Rights ⁽¹⁾ US\$'000	Inventory US\$'000	Prepaid lease payment US\$'000	Others US\$'000	Total US\$'000
At January 1, 2011	(8,877)	(472)	139,473	6,886	102	1,200	138,312
Charge (credit) to profit or loss	<u>(248)</u>	<u>(369)</u>	<u>(2,070)</u>	<u>(1,278)</u>	<u>(1)</u>	<u>(2,249)</u>	<u>(6,215)</u>
At December 31, 2011	(9,125)	(841)	137,403	5,608	101	(1,049)	132,097
(Credit) charge to profit or loss	<u>717</u>	<u>(609)</u>	<u>(2,047)</u>	<u>(7,033)</u>	<u>(2)</u>	<u>436</u>	<u>(8,538)</u>
At December 31, 2012	<u>(8,408)</u>	<u>(1,450)</u>	<u>135,356</u>	<u>(1,425)</u>	<u>99</u>	<u>(613)</u>	<u>123,559</u>

(1) Amount represents deferred tax liability arising from the fair value adjustment on mining rights during the business acquisition of Skyland in December 2010.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

8. INCOME TAX EXPENSE (Cont'd)

For the purpose of presentation in the consolidated statement of financial position, certain deferred tax assets and liabilities have been offset. The following is the analysis of the deferred tax balances for financial reporting purposes:

	2012 US\$'000	2011 US\$'000
Deferred tax assets	7,100	769
Deferred tax liabilities	<u>(130,659)</u>	<u>(132,866)</u>
	<u>(123,559)</u>	<u>(132,097)</u>

The Group's unrecognized deferred income tax assets are as follows:

	2012 US\$'000	2011 US\$'000
Deferred income tax assets		
Tax loss carry forwards	12,422	12,547
Other deductible temporary differences	<u>872</u>	<u>1,786</u>
Total unrecognized deferred income tax assets	<u>13,294</u>	<u>14,333</u>

No deferred tax asset has been recognized in respect of unused tax loss of US\$12,422,000 (December 31, 2011: US\$12,547,000) due to the unpredictability of future profit streams. Under Canadian tax laws, unused tax loss arising in a tax year ended between March 22, 2004 and December 31, 2005 can be carried forward for 10 years while the unused tax loss can be carried forward for 20 years if the loss is arising in tax years ended after December 31, 2005.

Other deductible temporary differences primarily comprise of share issue costs and cumulative eligible capital expenditures that were incurred by the Company which are tax deductible according to the relevant tax law in Canada. No deferred tax asset has been recognized because the amount of future taxable profit that will be available to realize such assets is unpredictable and not probable.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

9. PROFIT FOR THE YEAR

	2012 US\$'000	2011 US\$'000
Auditor's remuneration	714	699
Depreciation included in cost of sales and inventory	23,850	21,520
Depreciation included in administrative expenses (Note 5)	1,070	333
Total depreciation	24,920	21,853
Release of prepaid lease payment (included in cost of sales)	168	163
Amortization of mining rights (included in cost of sales)	14,252	15,710
(Gain) loss on disposal of property, plant and equipment	(6)	283
Staff costs		
Directors' and chief executive's emoluments (Note 10)	496	586
Retirement benefit contributions	647	397
Staff salaries and benefits	5,693	6,462
Total salaries and benefits included in administrative expenses (Note 5)	6,836	7,445
Share-based compensation	—	6
Staff salaries and benefits	—	9
Total salaries and benefits included in exploration and evaluation expenditure (Note 6)	—	15
Staff costs included in cost of sales and inventory	12,644	11,334
Total staff costs	19,480	18,794
Operating lease payments	1,361	548
Bank interest income	(5,830)	(2,417)
Government subsidies ⁽¹⁾	(5,064)	(2,007)

- (1) Government subsidies of US\$4,919,000 (2011: US\$1,978,000) have been received from the local Finance Bureau of Tibet in the current year as a reward for the Group's contribution to community development and environmental preservation in the local Tibet region. There is no condition attached to the subsidies and the entire amount is recognized as other income in 2012.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

10. DIRECTORS', CHIEF EXECUTIVE'S AND EMPLOYEES' EMOLUMENTS

(a) Directors' and Chief Executive's emoluments

The emoluments paid or payable to each of the nine (2011: nine) directors and the Chief Executive were as follows:

	2012				Total US\$'000
	Fees US\$'000	Salaries and other benefits US\$'000	Retirement benefit contributions US\$'000	Stock-based compensation US\$'000	
<u>Directors</u>					
Zhaoxue Sun*	—	—	—	—	—

Ian He	18	—	2	25	45
Gregory Hall	12	—	—	24	36
John King Burns	12	—	—	24	36
	<u>54</u>	<u>338</u>	<u>4</u>	<u>100</u>	<u>496</u>

	2011				Total US\$'000
	Fees US\$'000	Salaries and other benefits US\$'000	Retirement benefit contributions US\$'000	Stock-based compensation US\$'000	
<u>Directors</u>					
Zhaoxue Sun*	—	—	—	—	—
Xin Song*	—	—	—	—	—
Bing Liu	—	—	—	—	—
Xiangdong Jiang	—	230	2	11	243
Zhanming Wu*	—	75	2	—	77
Yunfei Chen	12	—	—	50	62
Ian He	18	—	1	61	80
Gregory Hall	12	—	—	50	62
John King Burns	12	—	—	50	62
	<u>54</u>	<u>305</u>	<u>5</u>	<u>222</u>	<u>586</u>

* Executive director

Mr. Xin Song is a director and Chief Executive of the Company. The emoluments disclosed above are inclusive of services rendered by him as the Chief Executive.

For the years ended December 31, 2012 and 2011, none of the directors of the Company have waived or agreed to waive any emoluments.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

10. DIRECTORS', CHIEF EXECUTIVE'S AND EMPLOYEES' EMOLUMENTS (Cont'd)

(b) Employees' emoluments

The five highest paid individuals included one (2011: one) director for the year ended December 31, 2012. The emoluments of the remaining four (2011: four) individuals for the year ended December 31, 2012, are as follows:

	2012 US\$'000	2011 US\$'000
Employees		
Salaries and other benefits	688	479
Retirement benefit contributions	5	7
	<u>693</u>	<u>486</u>

Their emoluments were within the following bands:

	No. of individuals	
	2012	2011
HK\$Nil to HK\$1,000,000 (equivalent to approximately US\$Nil to US\$128,000)	—	3
HK\$1,000,001 to HK\$1,500,000 (equivalent to approximately US\$128,000 to US\$192,000)	4	1
	<u>4</u>	<u>1</u>

During the years ended December 31, 2012 and 2011, no emoluments were paid by the Group to the directors of the Company or the five highest paid individuals as an inducement to join or upon joining the Group or as compensation for loss of office.

11. DIVIDEND

No dividends were paid or proposed during 2012 and 2011, nor has any dividend been proposed since the end of reporting period.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

12. EARNINGS PER SHARE

Earnings used in determining earnings per share ("EPS") are presented below:

	2012 US\$'000	2011 US\$'000
Income attributable to owners of the Company for the purpose of basic earnings per share	<u>70,938</u>	<u>79,408</u>
Weighted average number of shares, basic	<u>396,257,575</u>	396,153,549
Dilutive securities – Stock options	<u>80,044</u>	<u>154,140</u>
Weighted average number of shares, diluted	<u>396,337,619</u>	<u>396,307,689</u>
Basic earnings per share	<u>17.90 cents</u>	<u>20.04 cents</u>
Diluted earnings per share	<u>17.90 cents</u>	<u>20.04 cents</u>

13. CASH AND CASH EQUIVALENTS

Cash and cash equivalents of the Group are comprised of bank balances and bank deposits with an original maturity of three months or less. The Group's bank balances and cash equivalents are denominated in the foreign currencies other than the respective group entities' functional currencies are presented below:

	2012 US\$'000	2011 US\$'000
Denominated in:		
Canadian dollars ("CAD")	342	455
Renminbi ("RMB")	97,121	192,234
US\$	20	13,076
Hong Kong dollars ("HK\$")	<u>245</u>	<u>52,963</u>
Total cash and cash equivalents	<u>97,728</u>	<u>258,728</u>

The bank balances and bank deposits carry interest rates ranging from 0.5% to 3.5% (2011: 1.10% to 1.80%) per annum for the year ended December 31, 2012.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

14. ACCOUNTS RECEIVABLE

The Group's accounts receivable arise from the following sources: trade receivables, amounts due from the Company's shareholder and amounts due from related companies. These are broken down as follows:

	2012 US\$'000	2011 US\$'000
Trade receivables	1,234	704
Less: allowance for doubtful debts	(50)	(50)
	<hr/>	<hr/>
	1,184	654
Amounts due from the Company's shareholder (Note 28(a)) ⁽¹⁾	—	2,736
Amounts due from related companies (Note 28(a)) ⁽²⁾	1,354	1,398
Other receivables	842	1,057
	<hr/>	<hr/>
Total accounts receivable	3,380	5,845
	<hr/>	<hr/>

(1) The amount represented listing fee receivable from Rapid Result Investment Ltd, and deemed as capital contribution, which was unsecured, interest free and repayable on demand. The amount has been fully settled during the year ended December 31, 2012.

(2) As at December 31, 2011, the amount mainly represented consideration receivable from Gansu Zhongjin Gold Mining Co. Ltd, CNG's subsidiary, regarding the disposal of a mining project in November 2011. The outstanding balances as at December 31, 2012 represents service fee receivables arising from provision of transportation services to the subsidiaries of CNG during the year ended December 31, 2012. The amount is unsecured, interest free and repayable on demand.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

14. ACCOUNTS RECEIVABLE (Cont'd)

The Group's other receivables mostly represent employee cash and travel advances as at December 31, 2012 and December 31, 2011, which are unsecured, interest free and repayable upon written notice from the Group.

At December 31, 2012 and 2011, nil trade receivable is from gold doré bars sale to CNG (note 28(a)). The Group allows an average credit period of 90 days and 180 days to its external trade customers including CNG for gold doré bar sales and copper sales, respectively.

Below is an aged analysis of trade receivables (net of allowance) presented based on invoice dates, which approximated the respective revenue recognition dates, at the end of the reporting period:

	2012 US\$'000	2011 US\$'000
Less than 30 days	372	68
31 to 90 days	343	163
91 to 180 days	249	119
Over 180 days	220	304
	<u>1,184</u>	<u>654</u>

In determining the recoverability of a trade receivable, the Group considers any change in the credit quality of the trade receivable from the date credit was initially granted up to the reporting date. The customers with balances that are neither past due nor impaired have good repayment history and thus no impairment is considered necessary.

Included in the Group's trade receivables balances are debtors with aggregate carrying amount of US\$220,000 and US\$304,000 at 31 December 2012 and 2011, respectively, which are past due over six months for which the Group has not provided for impairment loss as there has not been a significant change in credit quality and amounts are still considered recoverable based on historical experience.

Movement in the allowance for doubtful debts:

	2012 US\$'000	2011 US\$'000
At January 1	50	42
Addition	—	8
	<u>50</u>	<u>50</u>

The Group holds no collateral for any receivable amounts outstanding as at December 31, 2012 and 2011.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

15. PREPAID EXPENSES, DEPOSITS AND OTHER RECEIVABLES

	2012 US\$'000	2011 US\$'000
Deposits for mine supplies and services (note a)	5,957	3,152
Deposits for spare parts	3,139	2,236
Deposits for environmental protection (note b)	4,753	4,109
Deposit for acquisition of property, plant and equipment (note c)	40,230	221
Prepaid property and machinery insurance	397	304
Amount due from a non-controlling shareholder (note d)	423	416
Others (note e)	1,098	1,793
	<hr/>	<hr/>
Total prepaid expenses, deposits and other receivables	55,997	12,231
Less: Amounts that are settled or utilized within one year shown under current assets	(10,270)	(6,372)
	<hr/>	<hr/>
Amounts that are settled or utilized for more than one year shown under non-current assets	45,727	5,859
	<hr/>	<hr/>

Notes:

- a. The amount represents deposits paid to third party vendors and related companies for purchasing of raw materials and inventory consumable. Included in the deposits, as at December 31, 2012, US\$321,000 (December 31, 2011: US\$318,000) are deposits for production safety monitoring services that are expected to be refunded upon closure of the relevant mine and therefore shown as non-current asset.
- b. The amount represents deposits paid to the PRC local bureau of land and resources for undertaking the restoration of land when the lease term is expired. Such amount is receivable upon the end of the mine life and is expected to be repaid after one year and therefore it is shown as a non-current asset at both 2012 and 2011 year end.
- c. The amount represents deposits paid to third party contractors for the acquisition of property, plant and equipment to expand its mining capacity in Tibet, the PRC. The amount is shown as non-current asset.
- d. The amount represented the amount due from Metrorkonga Jiama Cooperatives ("Jiama Cooperatives"), a non-controlling shareholder of Jiama Industry and Trade, a 51% owned subsidiary of Tibet Huatailong Mining Development Co., Ltd. ("Huatailong"). Huatailong, a wholly owned subsidiary of the Company, paid RMB2,450,000 (equivalent to approximately US\$423,000) on behalf of Jiama Cooperatives as the 49% capital contribution to Jiama Industry and Trade.

The amount is unsecured, interest-free and repayable on demand. As agreed between Huatailong and Jiama Cooperatives, Jiama Cooperatives can use future distribution of dividend by Jiama Industry and Trade to settle the amount. The Group considers that the amount due from Jiama Cooperatives will not be repayable within one year; therefore, it is classified as non-current asset.

- e. Included in the Others, as at December 31, 2011, US\$795,000 (equivalent to RMB5,000,000) was paid to the PRC local bureau land and resources for the acquisition of land use rights in Tibet and were included as non-current asset. The amount is written off during the year ended December 31, 2012.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

16. ENTRUSTED LOAN RECEIVABLE

On October 18, 2012, the Group entered into an entrusted loan agreement with CNG and Agricultural Bank of China (“ABC”) in which the Group provided a loan of RMB100 million (equivalent to approximately US\$16,052,000) to CNG through ABC as the entrusted bank. The entrusted loan is unsecured and carries interest at floating rate based on the People’s Bank of China base rate and will be repayable on May 13, 2013.

17. PREPAID LEASE PAYMENTS

	US\$'000	
At January 1, 2011		6,772
Release to profit or loss		(163)
Exchange realignment		<u>315</u>
At December 31, 2011 and January 1, 2012		6,924
Release to profit or loss		(168)
Exchange realignment		<u>64</u>
At December 31, 2012		<u>6,820</u>
	2012	2011

Analyzed for reporting purpose:		
Current portion	194	192
Non-current portion	<u>6,626</u>	<u>6,732</u>
	<u>6,820</u>	<u>6,924</u>

Prepaid lease payments represent payments for medium-term leasehold land located in the PRC. The prepaid lease payments are released to profit or loss over the remaining lease terms.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

18. INVENTORY

	2012 US\$'000	2011 US\$'000
Gold in process	26,192	23,408
Gold doré bars	4,127	8,506
Consumables	7,677	4,356
Copper	5,004	2,071
Spare parts	5,455	3,056
	<hr/>	<hr/>
Total inventory	48,455	41,397
Less: Amounts expected to be recovered after 12 months (note) (shown under non-current assets)	(10,005)	(14,292)
	<hr/>	<hr/>
Amounts shown under current assets	38,450	27,105
	<hr/>	<hr/>

Note:

Management has taken into consideration the long-term process involved in recovering gold from a heap leaching system and has classified inventory, specifically, the gold in process, that are expected to be recovered more than twelve months after the end of the reporting period into non-current assets.

Inventory totalling US\$193,206,000 (2011: US\$174,841,000) for the years ended December 31, 2012 was recognized in cost of sales.

19. AVAILABLE-FOR-SALE INVESTMENT

	2012 US\$'000	2011 US\$'000
Listed investment:		
– Equity securities listed in Hong Kong	20,570	—
	<hr/>	<hr/>

On June 29, 2012, the Group acquired 70,545,000 shares of China Nonferrous Mining Corporation Limited (“CNMC”), a listed company in Hong Kong at HK\$2.20 per share for a total consideration of US\$20,011,000 which represents 2.03% equity interest in CNMC.

On December 31, 2012, the investment was stated at fair value on quoted bid prices on December 31, 2012 and a fair value gain of US\$559,000 has been recognized in other comprehensive income.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

20. INVESTMENT IN AN ASSOCIATE

	2012 US\$'000	2011 US\$'000
Cost of investment in an unlisted associate	<u>803</u>	<u>—</u>

On November 28, 2012, the Group invested RMB5,000,000 (approximately US\$803,000) representing 10% share interest in Inner Mongolia Chengxin Yong'an Chemicals Co., Ltd. ("Yong'an Chemicals"). Yong'an Chemicals is incorporated in the PRC and principally engage in the development and manufacturing of chemicals. The Group is able to exercise significant influence over Yong'an Chemicals as the Group has the power to appoint one out of the three directors of Yong'an Chemicals under the provisions stated in the Articles of Association of Yong'an Chemicals.

The summarised financial information in respect of the Group's associate is set out below:

	2012 US\$'000
Total assets	7,940
Total liabilities	<u>(7,940)</u>
Net assets	<u>—</u>
The Group's share of net asset of associate	<u>—</u>

For the year ended December 31, 2012, the Group has no share of comprehensive income of associate as Yong'an Chemicals has not yet commenced its business since incorporation.

Included in the cost above is US\$15,984,000 (2011: US\$15,984,000) as at December 31, 2012 in relation to finance costs which have been capitalized as crusher and mineral assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

21. PROPERTY, PLANT AND EQUIPMENT (Cont'd)

The above items of property, plant and equipment, except for mineral assets, are depreciated using the straight-line method over the estimated useful lives of the related assets as follows:

Buildings	Over the shorter of the term of lease, or 24 years
Crusher	14 years
Furniture and office equipment	2 to 5 years
Machinery and equipment	2 to 10 years
Motor vehicles	5 to 10 years
Leasehold improvements	5.5 years

Mineral assets mainly represent drilling and related costs incurred on sites with an existing mine and on areas within the boundary of a known mineral deposit which contains proven and probable reserves and are capitalized prior to the commencement of production at the mine site. Mineral assets are depreciated using the unit-of-production method based on the actual production volume over the estimated total proven and probable reserves of the mines.

Mineral Assets

(a) CSH Gold Mine

CSH Gold Mine, in which our Group holds a 96.5% interest, consists of a licensed area of 36 square kilometers ("km²") in the western part of Inner Mongolia, northern China. The site is centrally positioned within the east-west-trending Tian Shan Gold Belt and is approximately 650 kilometers ("km") northwest of Beijing. The carrying value of the CSH Gold Mine in relation to mineral assets is US\$60,547,000 as at December 31, 2012 (December 31, 2011: US\$36,355,000).

(b) Jiama Mine

The Jiama Mine, a large copper-gold polymetallic deposit consisting of skarn-type and hornfels-type mineralization located in Metrorkongka County in Tibet, in which the Group holds 100% interest through its wholly-owned subsidiary, Skyland. The Group acquired Skyland on December 1, 2010. The Jiama Mine holds two exploration permits covering an area of approximately 76.9 km² and 66.4 km², respectively. The carrying value of the Jiama Mine in relation to mineral assets is US\$48,446,000 as at December 31, 2012 (December 31, 2011: US\$40,593,000).

(c) Dadiangou Gold Project

The Dadiangou project consists of a licensed area of 15 km² in Gansu Province, China. The project is located in the Qinling Fold Belt, a gold producing region that trends west to east through the provinces of Gansu and Shanxi in central China.

On April 28, 2010, the Group and Nuclear Industry Northwest Economic Technology Company ("Nuclear Industry"), the non-controlling shareholder of the Group's PRC subsidiary, Gansu Pacific Mining Company Ltd. ("Gansu Pacific"), entered into an agreement to sell the Dadiangou Gold Project owned by Gansu Pacific to Gansu Zhongjin Gold Mining Co. Ltd. (the Purchaser), a subsidiary of Zhongjin Gold Corporation Limited. The sale of Dadiangou Gold Project was considered as a related party transaction for the year ended December 31, 2011. The consideration is RMB88 million (approximately US\$13.1 million), of which the Group was entitled to 53%, or RMB46.6 million (approximately US\$7,215,000). The transaction was completed in November 2011 and the gain on disposal of this mining project was US\$6,932,000 (net of related tax).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

22. MINING RIGHTS

	Mining rights US\$'000
COST	
At January 1, 2011	976,466
Exchange realignment	<u>2,456</u>
At December 31, 2011 and January 1, 2012	978,922
Exchange realignment	<u>503</u>
At December 31, 2012	<u>979,425</u>
ACCUMULATED AMORTIZATION	
At January 1, 2011	(1,184)
Additions	(15,710)
Exchange realignment	<u>(24)</u>
At December 31, 2012 and January 1, 2012	(16,918)
Additions	(14,252)
Exchange realignment	<u>(23)</u>
At December 31, 2012	<u>(31,193)</u>
CARRYING VALUE	
At December 31, 2012	<u>948,232</u>
At December 31, 2011	<u>962,004</u>

Mining rights represent two mining rights in the Jiama Mine, in relation to the copper concentrate and other by-products production, acquired through the acquisition of the Skyland Group. The mining rights will expire in 2014 and 2015, respectively, the Group considers that it will be able to renew the mining rights with the relevant government authority continuously at insignificant cost.

Amortization on mining rights acquired is provided to write off the cost of the mining rights using the unit-of-production method based on the actual production volume over the estimated total proven and probable reserves of the mines.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

23. ACCOUNTS PAYABLE AND ACCRUED EXPENSES

Accounts payable and accrued expenses of the Group are principally comprised of amounts outstanding for trade purchases relating to minerals production activities and construction activities. The average credit period taken for trade purchases is between 120 to 150 days.

Accounts payables and accrued expenses comprise the following:

	2012 US\$'000	2011 US\$'000
Accounts payable	18,837	18,800
Construction cost payables	27,697	29,588
Advances from customers	6,221	1,736
Mining cost accrual	3,747	2,118
Other accruals	1,643	2,321
Payroll and benefit accruals	4,631	5,143
Other tax payables	6,803	8,389
Other payables	5,494	2,441
	<u>75,073</u>	<u>70,536</u>

The following is an aged analysis of the accounts payable presented based on the invoice date at the end of the reporting period:

	2012 US\$'000	2011 US\$'000
Less than 30 days	9,872	8,242
31 to 90 days	3,944	2,280
91 to 180 days	244	2,703
Over 180 days	4,777	5,575
	<u>18,837</u>	<u>18,800</u>
Total accounts payable	<u>18,837</u>	<u>18,800</u>

				<u>212,929</u>	<u>227,544</u>

(a) ABC Loan

On September 14, 2009, the Group’s subsidiary, Inner Mongolia Pacific Mining Co., Ltd. (“Inner Mongolia Pacific”), secured a five-year RMB290,000,000 (equivalent to US\$42,300,000) long-term loan (“Term Loan”) from ABC. The loan is secured and carries interest at floating rate based on the People’s Bank of China base rate.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

24. BORROWINGS (Cont'd)

(b) BOC Loan

The loan was borrowed from BOC in December 2009. The loan is secured and carries interest at floating rate based on the People's Bank of China base rate.

(c) Syndicated Loan

Skyland entered into a syndicated loan facility agreement with various banks on June 4, 2010 which is available for Skyland to draw down up to June 4, 2013. As at December 31, 2012, Skyland has drawn down the full loan amount of RMB750,000,000 (equivalent to approximately US\$120,389,000) (December 31, 2011: RMB702,000,000 equivalent to US\$111,547,000). The unutilized facility was nil (2011: RMB48,000,000 (equivalent to approximately US\$7,620,000)) as at December 31, 2012. The loan is secured and carries interest at the rate based on the People's Bank of China base rate.

(d) CCB Loan

Skyland entered into a loan facility agreement with CCB on November 9, 2012 which is available to be drawn down up to November 8, 2015. As at December 31, 2012, Skyland has drawn down RMB126,500,000 (approximately US\$20,306,000). The unutilized facility was RMB273,500,000 (approximately US\$43,902,000) as at December 31, 2012. The loan is unsecured and carries interest at the rate based on the People's Bank of China base rate.

	2012 US\$'000	2011 US\$'000
Within one year	72,234	44,492
Between one to two years	60,435	55,615
Between two to five years	<u>80,260</u>	<u>127,437</u>
	212,929	227,544
Less: Amounts due for settlement within 12 months (Shown under current liabilities)	<u>(72,234)</u>	<u>(44,492)</u>
	<u>140,695</u>	<u>183,052</u>

The Group pledged certain assets to secure the ABC, BOC and syndicated loans and the carrying values of the pledged assets are as follows:

	2012 US\$'000	2011 US\$'000
Property, plant and equipment	348,471	246,993
Mining rights	<u>948,232</u>	<u>962,004</u>
	<u>1,296,703</u>	<u>1,208,997</u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

25. DEFERRED INCOME

	2012 US\$'000	2011 US\$'000
Deferred income – government grants	728	865
Deferred lease inducement	75	110
	<hr/>	<hr/>
Total deferred income	<u>803</u>	<u>975</u>

Pursuant to the approval notices issued by the Ministry of Finance of the PRC in July 2010 and by the Provincial Bureau of Finance in Inner Mongolia of the PRC in December 2010, IMP received government grants in relation to the construction of property, plant and equipment of the Group amounting to approximately RMB4,839,000 (equivalent to approximately US\$715,000) during the year ended December 31, 2010. In addition, approximately RMB930,000 (equivalent to approximately US\$147,000) was further granted to IMP by local Finance Bureau in Inner Mongolia of the PRC in May 2011, in relation to construction of property, plant and equipment of the Group. The grants are recorded as deferred income in the consolidated statement of financial position and will be credited to profit or loss on a straight-line basis over the expected useful lives of the related assets.

Movement in the deferred income – government grants:

	2012 US\$'000	2011 US\$'000
At January 1	865	713
Addition	—	144
Charged to other income	(145)	(28)
Exchange realignment	8	36
	<hr/>	<hr/>
At December 31	<u>728</u>	<u>865</u>

26. ENVIRONMENTAL REHABILITATION

The environmental rehabilitation relates to reclamation and closure costs relating to the Group's mine operations at the CSH Gold Mine and Jiama Mine. The environmental rehabilitation is calculated as the net present value of estimated future net cash flows of the reclamation and closure costs, which total US\$41,890,000 (2011: US\$24,429,000), discounted at 11.2% (2011: 10.1%) per annum at December 31, 2012.

The following is an analysis of the environmental rehabilitation:

	2012 US\$'000	2011 US\$'000
At January 1	4,253	1,888
Additions to site reclamation	3,701	2,224
Utilization during the year	(1,124)	—
Reductions resulted from change in discount rate during the year	(698)	(127)

27. SHARE CAPITAL AND OPTIONS

(a) Common shares

- (i) Authorized – Unlimited common shares without par value
- (ii) Issued and outstanding

	Number of shares	Amount US\$'000
Issued & fully paid:		
At January 1, 2011	396,126,753	1,228,099
Exercise of stock option	<u>37,000</u>	<u>85</u>
At December 31, 2011 and January 1, 2012	396,163,753	1,228,184
Exercise of stock option	<u>155,000</u>	<u>547</u>
At December 31, 2012	<u>396,318,753</u>	<u>1,228,731</u>

(b) Stock options

The Group has a stock option plan which permits the board of directors of the Company to grant options to directors and employees to acquire common shares of the Company at the fair market value on the date of approval by the board of directors. A portion of the stock options vest immediately on the grant date and the balance vests over a period of up to five years from the grant date.

The stock options have a life of up to six years from grant date. The fair market value of the exercise price is the volume weighted average price of the common shares for the five days on which they were traded immediately preceding the date of approval by the board of directors.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

27. SHARE CAPITAL AND OPTIONS (Cont'd)

(b) Stock options (Cont'd)

The following is a summary of option transactions under the Group's stock option plan during the year:

	2012		2011	
	Number of options	Weighted average exercise price CAD	Number of options	Weighted average exercise price CAD
Balance at January 1	695,000	3.98	780,000	3.71
Options exercised	(155,000)	2.18	(37,000)	1.45
Options forfeited	—	—	(48,000)	3.95
Balance at December 31	<u>540,000</u>	<u>4.62</u>	<u>695,000</u>	<u>3.93</u>

295,000 stock options were granted during the year ended December 31, 2007 at exercise price of CAD2.2. These options will expire on July 20, 2013. 199,000 stock options were vested at December 31, 2011 while the remaining 96,000 stock options were vested on July 20, 2012. Approximately US\$8,000 and US\$28,000 were charged to the profit or loss for the year ended December 31, 2012 and 2011.

400,000 stock options were granted during the year ended December 31, 2010. The options were granted on June 1, 2010 and expire on June 1, 2015. The exercise price was CAD4.35 per share from June 1, 2010 until June 1, 2011, CAD4.78 per share from June 2, 2011 until June 1, 2012, CAD5.21 per share from June 2, 2012 until June 1, 2013, CAD5.64 per share from June 2, 2013 until June 1, 2014, and CAD6.09 per share from June 2, 2014 until June 1, 2015 or such later termination date as may apply. 20% of the shares vested immediately, on June 2, 2011 and June 2, 2012, an additional 20% of the options will be vested on June 2, 2013 and June 2, 2014, respectively. The fair value of these options at date of grant was approximately US\$860,000, of which approximately US\$94,000 and US\$200,000 were charged to the profit or loss for the year ended December 31, 2012 and 2011 respectively. No stock options were granted during the year ended December 31, 2012 and 2011.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

27. SHARE CAPITAL AND OPTIONS (Cont'd)

(b) Stock options (Cont'd)

The following table summarizes information about stock options outstanding and exercisable at December 31, 2012:

Expiring in	Options outstanding			Options exercisable	
	Number of stock options	Remaining contractual life (years)	Weighted average exercise price CAD	Number of stock options	Weighted average exercise price CAD
2013	140,000	0.55	2.20	140,000	2.20
2015	<u>400,000</u>	<u>2.42</u>	<u>5.47</u>	<u>240,000</u>	<u>5.21</u>
	<u>540,000</u>		<u>4.62</u>	<u>380,000</u>	<u>4.10</u>

The following table summarizes information about stock options outstanding and exercisable at December 31, 2011:

Expiring in	Options outstanding			Options exercisable	
	Number of stock options	Remaining contractual life (years)	Weighted average exercise price CAD	Number of stock options	Weighted average exercise price CAD
2013	295,000	1.56	2.20	199,000	2.20
2015	<u>400,000</u>	<u>3.42</u>	<u>5.30</u>	<u>160,000</u>	<u>4.78</u>
	<u>695,000</u>		<u>3.98</u>	<u>359,000</u>	<u>3.35</u>

The fair value of options granted was determined using the Black-Scholes option pricing model at the grant date.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

28. RELATED PARTY TRANSACTIONS

The Group operates in an economic environment currently predominated by enterprises directly or indirectly owned or controlled or significantly influenced by the PRC government (hereinafter collectively referred to as “Government-related entities”). In addition, the Group itself is a Government-related entity. CNG, a substantial shareholder with significant influence over the Group, is a state owned company registered in Beijing, PRC, which is controlled by State-owned Assets Supervision and Administration Commission of the State Council of the PRC.

During the year, except as disclosed below, the Group did not have any individually significant transactions with other Government-related entities in its ordinary and usual course of business.

Name and relationship with related parties during the years are as follows:

CNG owned the following percentages of outstanding common shares of the Company:

	2012 %	2011 %
CNG	39.3	39.3

(a) Transactions/balances with government-related entities in the PRC

(i) Transactions/balance with CNG and its subsidiaries

The Group had the following transactions with CNG and CNG’s subsidiaries:

	2012 US\$'000	2011 US\$'000
Gold doré bars sales by the Group	220,142	205,015
Provision of transportation services by the Group	1,638	—
Construction services provided to the Group	77,032	—

The Group’s gold doré bars were sold to CNG at market price under the relevant agreement.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

28. RELATED PARTY TRANSACTIONS (Cont'd)

(a) Transactions/balances with government-related entities in the PRC (Cont'd)

(i) Transactions/balance with CNG and its subsidiaries (Cont'd)

The Group has the following significant balances with CNG and its subsidiaries at the end of each reporting period:

	2012 US\$'000	2011 US\$'000
Assets		
Entrusted loan receivable from CNG (Note 16)	16,052	—
Interest receivable from entrusted loan to CNG ⁽¹⁾	575	—
Listing expense receivable ⁽¹⁾	—	2,736
Other receivables ⁽¹⁾	1,354	1,398
Prepayments for engineering and other geology services	—	416
	<u>17,981</u>	<u>4,550</u>
Total amounts due from CNG and its subsidiaries		

⁽¹⁾ The amounts due from CNG and its subsidiaries which are included in accounts receivable are non-interest bearing, with the exception of the entrusted loan, unsecured and have no fixed terms of repayments.

	2012 US\$'000	2011 US\$'000
Liabilities		
Other payable to CNG	—	32
Other payable to CNG's subsidiaries	—	1,159
	<u>—</u>	<u>1,191</u>
Total amounts due to CNG and its subsidiaries		

The amount due to CNG and its subsidiaries which are included in other payables, are non-interest bearing, unsecured and have no fixed terms of repayments.

(ii) Transactions/balances with other government – related entities in the PRC

Apart from the transactions with CNG and its subsidiaries disclosed above, the Group also conducts business with other government – related entities. The Group has entered into various transactions, including deposits placements, borrowings and other general banking facilities which are government – related entities in its ordinary course of business. Over 86% (2011: over 79%) of the Group's bank deposits and borrowings are with government related entities.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

28. RELATED PARTY TRANSACTIONS (Cont'd)

(b) Transactions/balances with other non-government related parties/entities

The Group has the following significant balances with related parties at the end of each reporting period:

	2012 US\$'000	2011 US\$'000
Asset		
Amount due from a non-controlling shareholder of a subsidiary (included in other receivables)	423	416
Total amount due from a related party	423	416

The amount due from the related party is non-interest bearing, unsecured and has no fixed terms of repayments.

Other than the directors' emoluments disclosed in Note 10(a), the Group has the following compensation to other key management personnel during the years:

	2012 US\$'000	2011 US\$'000
Salaries and other benefits	553	411
Post employment benefits	5	7
	558	418

29. SEGMENT INFORMATION

IFRS 8 requires operating segments to be identified on the basis of internal reports that are regularly reviewed by the chief operating decision-maker to allocate resources to the segments and to assess their performance.

The chief operating decision-maker, which is responsible for allocating resources and assessing performance of the operating segments, has been defined as the executive directors of the Company. The chief operating decision-maker has identified two operating segments as follows:

- (i) The mine-produced gold segment – the production of gold bullion through the Group's integrated processes, i.e., mining, metallurgical processing, production and selling of gold doré bars to external clients.
- (ii) The mine-produced copper segment – the production of copper concentrate and other by-products through the Group's integrated separation, i.e., mining, metallurgical processing, production and selling copper concentrate and other by-products to external clients.

Information regarding the above segments is reported below.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

29. SEGMENT INFORMATION (Cont'd)

(a) Segment revenues and results

The following is an analysis of the Group's revenue and results by segment.

2012

	Mine – produced gold US\$'000	Mine – produced copper US\$'000	Segment total and consolidated US\$'000
REVENUE – EXTERNAL	<u>223,775</u>	<u>108,612</u>	<u>332,387</u>
SEGMENT PROFIT	<u>94,882</u>	<u>30,047</u>	124,929
General and administrative expenses			(25,049)
Exploration and evaluation expenditure			(390)
Foreign exchange gain, net			171
Interest and other income			12,565
Finance costs			<u>(12,549)</u>
Profit before income tax			<u>99,677</u>

2011

	Mine – produced gold US\$'000	Mine – produced copper US\$'000	Segment total and consolidated US\$'000
REVENUE – EXTERNAL	<u>214,480</u>	<u>96,832</u>	<u>311,312</u>
SEGMENT PROFIT	<u>95,080</u>	<u>25,681</u>	120,761
General and administrative expenses			(17,369)
Exploration and evaluation expenditure			(467)
Gain on disposal of a mining project			6,932
Foreign exchange gain, net			2,355
Interest and other income			6,324
Finance costs			<u>(14,053)</u>
Profit before income tax			<u>104,483</u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

29. SEGMENT INFORMATION (Cont'd)

(a) Segment revenues and results (Cont'd)

The accounting policies of the operating segments are the same as the Group's accounting policies described in note 3. Segment profit represents the mine operating earnings earned by each segment representing the revenues less direct cost of sales as shown on the consolidated statement of comprehensive income. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and performance assessment.

There are no inter-segment sales for the year ended December 31, 2012 and 2011.

(b) Segment assets and liabilities

The following is an analysis of the Group's assets and liabilities by segment:

Segment assets	2012	2011
	US\$'000	US\$'000
Mine-produced gold	261,423	179,358
Mine-produced copper	<u>1,334,822</u>	<u>1,205,136</u>
Total segment assets	1,596,245	1,384,494
Available-for-sale investment	20,570	—
Cash and cash equivalents	181,740	354,313
Accounts receivable	127	4,437
Prepaid expenses, deposits and other receivables	361	412
Property, plant and equipment	121	119
Deferred tax assets	<u>7,100</u>	<u>769</u>
Consolidated assets	<u>1,806,264</u>	<u>1,744,544</u>
Segment liabilities	2012	2011
	US\$'000	US\$'000
Mine-produced gold	38,212	43,675
Mine-produced copper	<u>54,928</u>	<u>47,602</u>
Total segment liabilities	93,140	91,277
Accounts payable and accrued expenses	1,667	2,215
Borrowings	212,929	227,544
Deferred lease inducement (included in deferred income)	75	110
Deferred tax liabilities	<u>130,659</u>	<u>132,866</u>
Consolidated liabilities	<u>438,470</u>	<u>454,012</u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

29. SEGMENT INFORMATION (Cont'd)

Gain (loss) on disposal of property, plant and equipment	25	(308)	(283)	—	(283)

(d) Geographical information

The Group operated in two geographical areas, Canada and the PRC. The Group's corporate division located in Canada only earns revenue that is considered incidental to the activities of the Group and therefore does not meet the definition of an operating segment as defined in IFRS 8 *Operating Segments*. During the year ended December 31, 2012 and 2011, the Group's revenue was generated from gold sales and copper multi products to customers in the PRC.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

29. SEGMENT INFORMATION (Cont'd)

(e) Information about major customers

Revenue from major customers which accounts for 10% or more of the Group's revenue are as follows:

	2012 US\$'000	2011 US\$'000
Revenue from customers attributable to gold doré bars sales		
– CNG	<u>220,142</u>	<u>205,105</u>

The Group sells approximately 98.4% and 95.6% of its gold to one creditworthy customer, CNG who is also the Group's substantial shareholder for the years ended December 31, 2012 and 2011, respectively.

30. SUPPLEMENTAL CASH FLOW INFORMATION

Non-cash financing activities

The Group incurred the following non-cash financing activities:

	2012 US\$'000	2011 US\$'000
Transfer of share option reserve upon exercise of options	<u>206</u>	<u>33</u>

31. CAPITAL RISK MANAGEMENT

The Group manages its common shares and stock options as capital. The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to operate its mine, pursue the development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. The Group's overall strategy remains unchanged from prior years.

The Group manages the capital structure and makes adjustments to it in light of operating results, changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Group may attempt to issue new shares or options, issue of new debt, redemption of existing debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

In order to facilitate the management of its capital requirements, the Group prepares annual expenditure budgets that are updated as necessary depending on various factors, including operating results, successful capital deployment and general industry conditions. The annual and updated budgets are approved by the board of directors of the Company.

In order to maximize ongoing development efforts, the Group does not pay out dividends. The Group's investment policy is to invest its short-term excess cash in fixed bank deposits with maturities of 90 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

32. FINANCIAL INSTRUMENTS

	Financial instrument classification	2012 US\$'000	2011 US\$'000
<i>Financial assets</i>			
Cash and cash equivalents	Loans and receivables	181,740	354,313
Entrusted loan receivable	Loans and receivables	16,052	—
Accounts receivable	Loans and receivables	3,380	5,845
Amount due from a non-controlling shareholder (included in other receivables)	Loans and receivables	423	416
Available-for-sale investment	Available-for-sale	20,570	—
<i>Financial liabilities</i>			
Accounts payable and accrued expenses*	Other financial liabilities	52,028	50,829
Long-term loans	Other financial liabilities	92,540	115,997
Syndicated loan	Other financial liabilities	120,389	111,547

* Excluded advances from customers, other tax payables and accruals.

The fair values of the Group's cash and cash equivalents, entrusted loan receivable, accounts receivable, accounts payable and current portion of long-term loan and syndicated loan approximate their carrying values due to their short-term nature.

The Group's financial instruments are exposed to certain financial risks including market risk (e.g. currency risk and interest rate risk), credit risk and liquidity risk.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

32. FINANCIAL INSTRUMENTS (Cont'd)

(a) Currency risk

The Group is exposed to the financial risk related to the fluctuation of foreign exchange rates. Certain subsidiaries of the Company operate in the PRC and Canada with functional currency of US\$. A significant change in the currency exchange rates between RMB relative to US\$ could have a significant effect on the Group's results of operations, financial position or cash flows. The Group has not hedged its exposure to currency fluctuations.

RMB monetary assets and liabilities

	2012 US\$'000	2011 US\$'000
Cash and cash equivalents	97,121	192,234
Entrusted loan receivable	16,052	—
Accounts receivable	480	190
Accounts payable and accrued expenses	(19,246)	(18,146)
Borrowings	(24,078)	(36,547)
	<u>70,329</u>	<u>137,731</u>

Sensitivity analysis

Based on the above net exposures, and assuming that all other variables remain constant, a 5% (2011: 5%) appreciation/depreciation of the RMB against the US\$ would result in an increase/decrease in the Group's profit for the year of approximately US\$2,637,000 for the year ended December 31, 2012 and a decrease/increase in the Group's profit for the year of approximately US\$5,165,000 for the year ended December 31, 2011.

(b) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to cash flow interest rate risk on the variable rate bank balances, entrusted loan receivable (note 16) and variable-rate bank borrowings (see note 24 for details of these borrowings). It is the Group's policy to keep its borrowings at floating rate of interests so as to minimise the fair value interest rate risk.

Sensitivity analysis

The following analysis is prepared assuming the financial instruments outstanding at the end of the reporting period were outstanding for the whole year and all other variables were held constant. A 25 basis point (2011: 25 basis points) increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates. A positive number below indicates an increase in profit of the Group for the year ended December 31, 2012 and 2011 because the interest rate increases. For a decrease in the interest rate, there would be an equal and opposite impact on the Group's profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

32. FINANCIAL INSTRUMENTS (Cont'd)

(b) Interest rate risk (Cont'd)

Sensitivity analysis (Cont'd)

For bank balances, the analysis below reflects the sensitivity that the interest rate may increase by 25 basis points/ decrease by 25 basis points (2011: increase by 25 basis points/decrease by 25 basis points) or limit to 0% .

	2012 US\$'000	2011 US\$'000
25 basis points (2011: 25 basis points) higher	(28)	138
25 basis points (2011: 25 basis points) lower	28	(138)

The Group monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arise.

(c) Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial asset fails to meet its contractual obligations. The Group sells approximately 98.4% (2011: 95.6%) of its gold to one creditworthy customer, CNG, who is also the Group's substantial shareholder for the years ended December 31, 2012 and 2011 and exposes the Group to concentration of credit risk. The failure of this customer to make required payments could have a negative impact on the Group's results. The Group manages this risk by demanding upfront payment from this customer.

The Group's cash and short-term bank deposits are held in large PRC and Canadian banks. These investments mature at various dates within three months.

The Group had concentration of credit risk by geographical locations as the other receivables comprise various debtors which are located either in the PRC or Canada for the years ended December 31, 2012 and 2011.

Other than the concentration of the credit risk on bank balances and accounts receivable, the Group does not have any other significant concentration of credit risk.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

32. FINANCIAL INSTRUMENTS (Cont'd)

(d) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group manages liquidity risk through the management of its capital structure and financial leverage as outlined in Note 31.

The following table details the Group's remaining contractual maturities for its non-derivative financial liabilities (see Note 34 for other commitments). The table is based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to satisfy the liabilities.

To the extent that interests flows are floating rate, the undiscounted amount is derived from interest rate curve at the end of the reporting period.

	Weighted average interest rate %	Within 1 year US\$'000	1 – 2 years US\$'000	2 – 5 years US\$'000	Total undiscounted cash flow US\$'000	Carrying amount US\$'000
2012

		<u>106,776</u>	<u>64,160</u>	<u>136,743</u>	<u>307,679</u>	<u>278,373</u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

32. FINANCIAL INSTRUMENTS (Cont'd)

(e) Fair value

The fair value of other financial assets and financial liabilities is determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

The Group considers that the carrying amounts of financial assets and financial liabilities recorded at amortized cost in the consolidated financial statements approximate their fair values.

Fair value measurements recognized in the consolidated statement of financial position

Subsequent to initial recognition at fair value, the available-for-sale investment is measured from quoted prices (unadjusted) in active market (Level 1 fair value measurements). There was no transfer between Level 1 and 2 in the current year and prior years.

33. CONTINGENT LIABILITIES

During the year ending December 31, 2012, the Company received a notice from China International Economic and Trade Arbitration Commission (the "Commission") alleging that the Company breached the agreement with one of its construction suppliers. The Company filed a countersuit against the construction supplier to the Commission for the unsatisfactory result of the construction and the destruction of certain plant, property and equipment. As a result, the Commission assigned a third party expert for evaluation of the validity of the claims made by both parties. As of the date of the report, the evaluation is still in progress, and therefore, management considers the arbitration to be in a preliminary stage and the potential loss cannot be measured reliably.

34. COMMITMENTS AND CONTINGENCIES

Operating leases commitments

At the end of each reporting period, the Group had commitments for future minimum lease payments under non-cancellable operating leases which fall due as follows:

	2012 US\$'000	2011 US\$'000
Within one year	1,908	1,415
In the second to fifth year inclusive	864	977
Over five years	742	1,055
	<hr/>	<hr/>
	3,514	3,447
	<hr/>	<hr/>

Operating lease payments represent rentals payable by the Group for its premises. Leases are negotiated for a term of one to five years.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012

34. COMMITMENTS AND CONTINGENCIES (Cont'd)

Capital commitments

	2012 US\$'000	2011 US\$'000
Capital expenditure in respect of acquisition of property, plant and equipment in the consolidated financial statements – contracted but not provided for	<u>171,024</u>	<u>58,441</u>
Capital expenditure in respect of capital injection to an associate	<u>4,816</u>	<u>—</u>

Other commitments and contingencies existed at the end of each reporting period

In October 2006, the Group signed a ten-year service contract with a third party to provide mining services to the Group commencing in the first quarter of 2007. The value of the mining service of each year will vary and is dependent upon the amount of mining work performed.

35. RETIREMENT BENEFITS SCHEMES

The employees of the Group's subsidiaries are members of a state-managed retirement benefits scheme operated by the PRC government. The subsidiaries are required to contribute a certain percentage of payroll cost to the retirement benefits scheme to fund the benefits. The only obligation of the Group with respect to the retirement benefits scheme is to make the specified contributions.

The total costs charged to the consolidated statement of comprehensive income and cost of inventory are approximately US\$1,221,000 and US\$723,000 for the years ended December 31, 2012 and 2011, respectively, represent contributions payable to the scheme by the Group.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended December 31, 2012
