

CHINA GOLD INTERNATIONAL TO EXCEED PRODUCTION GUIDANCE

VANCOUVER, December 6, 2018 – China Gold International Resources Corp. Ltd. (TSX: CGG; HKEx: 2099) (“*China Gold International Resources*” or the “*Company*”) is pleased to announce it is well positioned to exceed its previously provided 2018 production guidance as follows:

- 2018 gold production is expected to be approximately 30% above the original guidance of 160,000 ounces forecasted at the beginning of the year. The increase in gold production is mainly attributable to the Company’s CSH Gold Mine increasing its recovery rates and achieving success in the optimization of ore processing, which has resulted in the CSH Gold Mine exceeding its anticipated production. The increase in gold production is also attributable to the commencement of commercial production for the Phase II Series II expansion of the Company’s Jiamia Copper-Polymetallic Mine ahead of schedule, which resulted in a larger than anticipated processing capacity at the Jiamia Mine.
- 2018 copper production is expected to be approximately 15% above the original guidance of 100 million pounds forecasted at the beginning of the year. The increase in copper production is mainly attributable to the commencement of commercial production for the Phase II Series II expansion of the Company’s Jiamia Copper-Polymetallic Mine ahead of schedule, which resulted in a larger than anticipated processing capacity at the Jiamia Mine.

Mr. Liangyou Jiang, the Company’s CEO, stated: “Our Company’s excellent track record of developing mines and fostering strong, mutually beneficial relationships with local stakeholders gives us confidence that the Company will be better positioned to maximize value for shareholders. I would like to congratulate all members of our team on this increased progress. I would also like to thank our board and shareholders, who continue to believe in and support us in our efforts.”
