- Mine operating earnings decreased by 57% to US\$96.6 million from US\$223.2 million for the same period in 2022.

The decrease in net profit is mainly attributable to the suspension of the production of the Jiama Mine since March 27, 2023 due to the overflow at the Guolanggou tailings pond. As a result of the suspension, the Company did not record any product sales from the Jiama Mine during 2023 Q2, with the exception of a minor amount of molybdenum, leading to a sharp decline in the Company's net profit for the first half of 2023.

The repair and major reinforcement works of tailings dam have been completed and some reinforcement works are still in the final stage. The Company is committed to submitting a safety assessment report to the regulatory authority on or around the end of August 2023. The overall progress is on schedule with the timeline as disclosed in the Company's announcement dated on May 5, 2023. Production operations at CSH Gold Mine remain stable.

The Company's Chairman and CEO, Mr. Junhu Tong, stated, "Due to the suspension of the production of the Jiama Mine, the Company's performance for the first half of 2023 showed an expected decline. The Company is actively striving for an early resumption of production of Jiama Mine. At CSH Gold Mine, while continuing to maintain a high production level, we are vigorously advancing the development of the deeper underground resources to create additional value and extend the mine life. We will continue to operate our business with a high degree of responsibility. Thanks to our shareholders and stakeholders for their understanding and support."
